

## Course Information Sheet for entry in 2018-19

### DPhil in Architectural History

#### About the course

It is possible to study for a doctorate by part-time research in architectural history. Students studying for the DPhil part-time normally study for five to eight years. This compares with a full-time DPhil which normally takes three to four years to complete.

The DPhil programme draws on considerable experience in providing advanced tuition in architectural history. It profits from the close links within the department between the disciplines of architectural history, art history, English local history and landscape archaeology. It also has links with other parts of the University, particularly the Faculty of History, the Department of the History of Art, and Kellogg College, amongst the fellows of which is the largest concentration of architectural historians associated with the University.

The programme is overseen by the Continuing Education Board of the University. Admission is through the Department for Continuing Education.

Supervision on the DPhil programme is provided by specialist tutors from the Department and elsewhere in Oxford. In broad terms, supervision is possible in most areas of British architectural history (as defined above) from the middle ages to the present, and some European topics. In terms of Great Britain, academic staff currently have particular research interests in ecclesiastical buildings, medieval castles, great houses and their landscapes; country houses; vernacular architecture; urban and institutional architecture, especially of London and Oxford, from 1660 to the present.

Supervision is provided on an individual basis, tailored to the specific needs of students and to their subjects. Doctoral training is provided through the department's Graduate School, and other agreed learning requirements (eg foreign languages) can draw on the resources of both the department and the wider University. Graduate students in the department have access to the full range of Oxford's library, archive and computing facilities, as well as to Oxford's extensive range of graduate and research seminars.
