

Course Information Sheet for entry in 2018-19

DPhil in Astrophysics

About the course

The DPhil in Astrophysics is a research-based degree offered by the astrophysics and theoretical physics sub-departments, available to students interested in carrying out research in observational or theoretical astrophysics, or in instrumentation. The course has a strong track record of preparing students for careers in academia and beyond.

The DPhil is a research-based course that normally takes three to four years of study. You will be expected to carry out your own research in areas drawn from the sub-department's exceptionally broad range of research, exploiting access to high performance computing and to the full range of space and ground-based facilities where necessary.

You should closely consult the the sub-department's areas of research interest and the list of available projects. Particular strengths include the study of cosmology, galaxies and black holes, instrumentation and large telescope projects and stars and exoplanets.

You will be a member of a lively research environment, and the department places great emphasis on matching student and supervisor so that work on the main research project can begin as soon as possible. A taught graduate course in the first year runs in parallel to this work, providing a comprehensive overview of both the state of modern astrophysics and the necessary skills required to make progress in 21st century research. Students are also expected to attend a suitable short course from the MPhys or other courses. Neither part of this graduate program is examined.

The lively programme of seminars, colloquia and discussion meetings held in the department ensures that you remain in touch with the cutting edge of the subject and provide an opportunity to interact with staff and with the large number of visitors who pass through the department each year. They also provide plenty of opportunity for you to gain experience in presenting their science, a critical part of a modern researcher's life.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

3 to 4 years

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£4,260	£3,112	£7,372
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2018-19 is £468, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
