

Course Information Sheet for entry in 2018-19

DPhil in Clinical Medicine

About the course

As a DPhil in Clinical Medicine student, you will conduct research in basic science and/or in clinical medicine. The degree will provide you with research skills, in-depth knowledge, understanding and expertise in your chosen field of research. Research subjects cover a broad spectrum of sciences related to medicine.

Applicants are strongly advised to visit the Medical Sciences Graduate School website to help them identify the most suitable course and supervisors.

As a doctoral student with the Nuffield Department of Medicine, you will carry out research in a single laboratory for three to four years. There is no period of rotation between laboratories. All doctoral students develop their skills through a range of research training and skills development in their first year, by attending compulsory and optional courses and lectures in laboratory techniques and generic skills, including scientific writing and statistics, while also working at the bench.

You will be encouraged to attend lectures and seminars related to your programme of research and make the most of the doctoral training and research methods provision available across the Medical Sciences division. The aim is to tailor this training to individual needs and bring all students up to satisfactory level in background knowledge. Later training is focused on the skills required for a successful career in independent research.

The department's students are part of the Medical Sciences Division; lectures and seminars cut across departments and collaborations are widespread within the University.

The Nuffield Department of Medicine(NDM) comprises research groups in several institutes and laboratories, including:

- the Centre for Cellular and Molecular Physiology (CCMP)
- the Jenner Institute (JENNER)
- the Ludwig Institute for Cancer Research Oxford Branch (LICR)
- the Structural Genomics Consortium (SGC)
- the Division of Structural Biology (STRUBI)
- Wellcome Centre for Human Genetics (WHG)
- Experimental Medicine (EXPMED)
- NDM Research Building (NDMRB).

The department also has a Tropical Medicine (TROPMED) unit and its major overseas programmes are based primarily in Thailand, Vietnam and Kenya.

In exceptional cases, students may be admitted to study for the MSc by Research degree.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

3 to 4 years

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£4,260	£3,112	£7,372
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2018-19 is £468, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
