

Course Information Sheet for entry in 2018-19

DPhil in Ion Channels and Disease

About the course

The programme trains you in a range of multidisciplinary approaches and embraces all aspects of ion channel and membrane transport research from protein structure, genetics and cell physiology to animal behaviour and human disease. The first year is devoted to taught courses and two rotation-projects. This is followed by a three-year research project involving two different OXION groups.

Applicants are advised to visit the course webpage for further information about supervisors associated with this course.

In the first year, you will be introduced to a wide range of scientific disciplines and techniques involving two extended laboratory rotations. During the first three months you will attend a series of specialist lectures and demonstrations that will provide an introduction to a range of multidisciplinary skills in integrative physiology.

A unique aspect of the programme is the provision of extensive 'hands-on' practical experience in a wide range of experimental techniques. These include whole animal in vivo physiology, animal behaviour, immunohistochemistry, and electrophysiological recording techniques, as well as cutting-edge biochemical, biophysical, structural and computational methods for studying ion channels and membrane proteins. You will also be required to pass the PILB and PILC (formerly known as modules one to four) of the Home Office Personal Licence.

From the second to fourth years, you will focus on your doctoral research project. A key feature of the OXION programme is that this must be a multidisciplinary project that involves more than one research group. Such joint projects not only help you develop independence and a wider range of skills, but also facilitate important collaborations between groups. The primary supervisor will be drawn from a list of those working directly on ion channels or transporters but the choice of co-supervisor may depend on the nature of the project and techniques required. The final choice of both project and host research groups will be made by you in conjunction with the Organising Committee.

Your progress is monitored by the Programme Directors and you will be required to meet standard University milestones for progress involving formal monitoring via supervisor feedback forms submitted three times per year.

Where appropriate, you will also have the opportunity to take additional graduate modules to equip yourself with new skills that might be required for your project, or to update your knowledge of major new developments in your own (or related) research field. Training will also be provided in other relevant transferable skills such as writing research papers, planning/writing a thesis and presentation skills.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

4 years

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£4,260	£3,112	£7,372
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2018-19 is £468, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
