

## Course Information Sheet for entry in 2018-19

### DPhil in Molecular Cell Biology in Health and Disease

#### About the course

You will spend up to four years in one of the department's many research groups, working on a project supervised by the group's principal investigator. During this period you will have the opportunity to take part in the comprehensive training programme organised for graduate students.

After a very short induction period of one or two weeks, during which some basic training is provided, you will start a research project in your supervisor's laboratory.

You will be supervised by a team that includes your main supervisor, a graduate advisor and the Director of Graduate Studies. Your graduate adviser will usually be another experienced principal investigator in the department. Your supervisor may appoint a senior member of the laboratory as your day-to-day supervisor. Most laboratories have weekly meetings where members present and discuss their research results with other members of the laboratory. Further support is available from your college advisor.

There are a number of key stages in the research programme.

1. Within a month of starting, you will meet with your supervisor and graduate adviser to finalise your project and agree on an initial programme of research.
2. Within the first three months, you will complete an analysis of your training needs with your supervisor.
3. Within the first six months you are expected to complete a literature review on a topic relating to your area of research.
4. After one year you will apply to transfer to DPhil status. To do this you write a report describing your research to date and plans for the future. This will be assessed by two independent experts, who interview you as part of the process.
5. You will apply to confirm your DPhil status by the end of your third year. This involves writing a short progress report and thesis outline and giving a presentation. The application is assessed by two experts.
6. The final stage is submission of your DPhil thesis, which needs to be done within four years.

Whilst working on your research project you will participate in a comprehensive, flexible skills training programme which includes a range of workshops and seminars in transferable skills, generic research skills and specific research techniques. There are also numerous seminars and lectures by local and visiting scientists and you are provided with many opportunities to meet leading scientists.

There are a wide range of events organised for DPhil students. All students participate in an annual graduate students' symposium, which is attended by the entire department. Student contributions are carefully evaluated and prizes are awarded to the best posters or presentations in each year.

#### Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

#### Expected length of course

3 to 4 years

## Costs

### Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£4,260	£3,112	£7,372
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2018-19 is £468, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£258	£361	£2,318	£3,245	£3,090	£4,326
<b>Accommodation</b>	£536	£677	£4,824	£6,093	£6,432	£8,124
<b>Personal items</b>	£118	£263	£1,066	£2,364	£1,421	£3,152
<b>Social activities</b>	£41	£123	£369	£1,105	£492	£1,474
<b>Study costs</b>	£39	£85	£348	£765	£464	£1,020
<b>Other</b>	£22	£47	£202	£419	£269	£559
<b>Total</b>	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).
