

## Course Information Sheet for entry in 2018-19

### DPhil in Radiation Oncology (1+3)

#### About the course

The Department of Oncology offers a four-year combined taught and research programme in radiation oncology comprised of the MSc in Radiation Biology in the first year followed by the DPhil in Oncology in the second to fourth years.

The MSc is a full-time, taught course in radiation biology. It consists of a five-month core theoretical programme (October to February) that covers emerging areas of radiation biology and radiation oncology, followed by a six-month period (March to August) to pursue a high-quality basic or clinically-applied research project. The research project is supervised by a senior academic member of the CRUK/MRC Oxford Institute for Radiation Oncology.

On successful completion of the MSc taught programme, students progress to the full-time DPhil in Oncology. Their doctoral research is conducted under the supervision of same academic that oversaw the student's MSc project.

Students begin the three-year DPhil in Oncology programme as a probationary research student (PRS). Towards the end of the first year, students are required to write a report prior to transfer to DPhil (PhD) status. Progress is evaluated by two academic assessors, who are not directly involved in the student's supervision. Continuation on the DPhil programme is subject to passing the Transfer of Status assessment.

Students must confirm their DPhil status and are encouraged to do so during their eighth term and by no later than the end of the ninth term. Students are expected to submit their thesis between the ninth and twelfth terms from being admitted as a PRS.

In addition to the standard University milestones described above, a student's progress is formally recorded via supervisor feedback forms submitted termly, ie three times per year. The University has a code of practice for supervision of research under which supervisors must:

- advise, guide and support the student in all aspects of their research project
- identify a clear plan of research
- draw up a timetable for research
- have regular meetings
- report on the student's progress
- identify the student's training needs
- encourage the student to participate in the wider Oxford community.

#### Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

#### Expected length of course

4 years

## Costs

### Annual fees for entry in 2018-19

During the first year of the course you will be charged tuition and college fees at the MSc in Radiobiology fee rate.

#### Annual MSc in Radiobiology fees for the 2018-19 academic year

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	c. £4,320	£3,112	c. £7,432
Overseas	£19,915	£3,112	£23,027

In each subsequent year, you will be charged fees at the DPhil in Oncology fee rate for that year of study. For an indication of costs, the table below shows the annual DPhil in Oncology tuition and college fees for the 2018-19 academic year.

#### Annual DPhil in Oncology fees for the 2018-19 academic year

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	c. £4,320	£3,112	c. £7,432
Overseas	£19,915	£3,112	£23,027

Tuition and college fees are payable for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees). Fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2018-19 is £468, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Please note that, depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£258	£361	£2,318	£3,245	£3,090	£4,326
<b>Accommodation</b>	£536	£677	£4,824	£6,093	£6,432	£8,124
<b>Personal items</b>	£118	£263	£1,066	£2,364	£1,421	£3,152
<b>Social activities</b>	£41	£123	£369	£1,105	£492	£1,474
<b>Study costs</b>	£39	£85	£348	£765	£464	£1,020
<b>Other</b>	£22	£47	£202	£419	£269	£559
<b>Total</b>	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).
