

Course Information Sheet for entry in 2018-19

DPhil in Zoology

About the course

The Department of Zoology maintains a large and interactive group of around 170 DPhil students at any one time, working in the research areas of the department.

As a doctoral student at the Department of Zoology, your primary focus will be your research, which will usually be conducted within one or more of the existing research groups. In addition, you will be encouraged to make the most of the doctoral training and research methods provision available across the Mathematical, Physical and Life Sciences Division.

Doctoral research projects can be based on fieldwork (sometimes in remote places), laboratory experiments, analysis of existing data sets, or mathematical theory, but in all cases must be original and rigorous, leading to publications in peer-reviewed scientific journals.

You will be part of a vibrant educational research community that includes an active set of doctoral student-led events, seminars and workshops. You will have the opportunity to present and discuss your work in progress with your supervisor, other faculty members and peers, informally day-to-day and by attending a variety of seminars and workshops in the department and at conferences elsewhere.

You will first be admitted as a Probationary Research Student (PRS) and at the end of your first year you will be able to apply for transfer to the status of DPhil candidate. Conferment of the title of DPhil is conditional on submission of a thesis and success in an oral (*viva voce*) examination in front of one Oxford-based and one external examiner.

MSc by Research in Zoology

In exceptional cases, the department also takes students who wish to study for a MSc by Research in Zoology, which typically takes two years. Since few students are accepted to this degree, there must be a strong academic case.

The minimum time in which a student can submit their final thesis for an MSc by Research is one year, and the maximum fee liability for an MSc by Research is two years, but the overall course length is three years.

The first step in applying is to contact a potential supervisor or supervisors to discuss potential projects. For further details and to apply to the MSc by Research, please contact Heather Green.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

3 to 4 years

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£4,260	£3,112	£7,372
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2018-19 is £468, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

Many projects have associated costs such as field work, consumables and laboratory costs. These are usually covered by scholarships but not always. Students will need to establish with their supervisor whether they have funding available to cover any such costs.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
