

Course Information Sheet for entry in 2023-24: Inorganic Chemistry for Future Manufacturing (EPSRC Centre for Doctoral Training)

About the course

OxICFM offers a four-year doctoral course focusing on synthetic inorganic chemistry. It features integrated academic/industrial courses and substantive projects spanning the breadth of molecular, nano-scale and extended materials chemistry.

The Centre for Doctoral Training in Inorganic Chemistry for Future Manufacturing (OxICFM) aims to train the next generation of doctoral scientists in the synthesis of inorganic materials relevant to the future prosperity of the manufacturing sector. The course has been designed in collaboration with 12 industrial partners representing a range of business sizes and technological expertise, in order to provide a holistic understanding of all aspects of the chemical manufacturing process.

OxICFM uses a cohort model (12+ students per year), allied to training incorporating faculty-, industry- and peer-led components, to deliver scientists with (i) a broad spectrum training across the interface between inorganic synthesis and manufacturing, and (ii) in-depth expertise in one specific stream (molecular, nano-scale or extended materials).

Students are trained in a single cohort initially (in the first six months) through a series of taught courses, covering a wide range of topics in synthetic inorganic chemistry. Details of the modules are provided on the CDT's website. From the second half of year one, students will focus primarily on their substantive research project, which they will have chosen prior to the start of their course. During all four years of the programme students also receive a tailored programme designed to broaden their research and professional skills.

Supervision

The allocation of graduate supervision for this course is the responsibility of the Department of Chemistry and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. A supervisor may also be found outside the Department of Chemistry.

In the case of students who require specific help to adjust to an academic programme or to a new range of skills, the supervisor will work with them to ensure that they have additional support.

Students can typically expect to meet with their supervisor or a senior member of the research team on a weekly basis.

Assessment

All modules during the taught course component involve some aspect of formal assessment, including written reports, problem solving, and group and individual presentations. Throughout the project component of the course, a termly report on the student's progress is submitted by both the student and their supervisor. You will be admitted as a Probationary Research Student and, at an appropriate stage (normally after six terms), students must pass the Transfer of Status assessment, to ensure they have the potential to gain a doctorate, in line with the University's graduate student progression guidelines. This assessment will be made on the basis of overall performance in the taught course component, together with a project report and oral examination.

At the beginning of their fourth year students must pass the Confirmation of Status assessment, to ensure that they are on track to complete the thesis within a reasonable time. The degree is examined by thesis and oral examination by two examiners, one of whom is normally from Oxford and one from elsewhere.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. These may include significant changes made necessary by a pandemic (including Covid-19), epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

Expected length of course

	Full Time Only
Expected length	4 years

Please visit the Department of Chemistry for further information about funding.

Costs

Annual fees for entry in 2023-24

Fee status	Annual Course fees
Home	£8,960
Overseas	£29,700

Information about course fees

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2023-24 is £572, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £600 per term. Please contact your college for more details.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2023-24 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

Likely living costs for one month

	Lower range	Upper range
Food	£300	£470
Accommodation	£715	£860
Personal items	£180	£305
Social activities	£40	£90
Study costs	£35	£80
Other	£20	£35
Total	£1,290	£1,840

Likely living costs for nine months

	Lower range	Upper range
Food	£2,700	£4,230
Accommodation	£6,435	£7,740
Personal items	£1,620	£2,745
Social activities	£360	£810
Study costs	£315	£720
Other	£180	£315
Total	£11,610	£16,560

Likely living costs for twelve months

	Lower range	Upper range
Food	£3,600	£5,640
Accommodation	£8,580	£10,320
Personal items	£2,160	£3,660
Social activities	£480	£1,080
Study costs	£420	£960
Other	£240	£420
Total	£15,480	£22,080

When planning your finances for any future years of study at Oxford beyond 2023-24, it is suggested that you allow for potential increases in living expenses of 5% or more each year – although this rate may vary significantly depending on how the national economic situation develops.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.

Document accessibility

If you require an accessible version of the document please contact Graduate Admissions and Recruitment by email (graduate.admissions@admin.ox.ac.uk) or via the online form (<http://www.graduate.ox.ac.uk/ask>).
