

## Course Information Sheet for entry in 2018-19

### MPhil in Development Studies

#### About the course

The two-year MPhil in Development Studies will provide you with a rigorous and critical introduction to development as a process of managed and unmanaged change in societies in the global South. The course is an excellent preparation for a career in development policy or practice or for further study in the field.

#### Aims

The course will introduce you to development studies as an interdisciplinary and multidisciplinary subject. It covers the intellectual history of development, the paradigm shifts and internal conflicts within the discipline and the contemporary relevance of research to development policy and practice.

#### Structure

The course comprises five elements: foundation courses, research methods, the core course, the thesis and two option courses.

In the first year, you will study two out of three foundation courses:

- Economics
- History and Politics
- Social Anthropology

If you have no previous training in economics you must take this as one of your foundation courses; otherwise you must take the other two.

You will also follow a course in research methods for the social sciences, comprising sessions on research design and qualitative and quantitative methods. Thesis workshops will offer preparation for your research. Additional sessions will be held on aspects of fieldwork ethics and safety, library resources and software and computerised databases.

The core course, also taken in the first year, is an interdisciplinary and multidisciplinary course with two component modules:

- Ideas about Development
- Key Themes in Development

You will spend the summer following your first year working on a 30,000-word thesis. You will choose the topic, with the guidance of your supervisor, and, in most cases, spend some of the summer doing fieldwork and gathering data.

In the second year, you will take your chosen option courses and continue work on your thesis. More information can be found in the course handbook.

#### Teaching

Each course entails three to five hours of teaching per week, delivered through lectures, classes and workshops. Class sizes are small – between 5 and 30 students – encouraging active participation and enabling students to learn from each other. You prepare for sessions by reading a selection of recommended books, book chapters and articles.

You will be allocated a general supervisor who will support your academic development and with whom you will meet regularly. Allocation is based on your research interests, optimal fit with the supervisor's expertise, and staff availability. Where dissertation supervision requires expertise that is not available among the core staff, an additional dissertation supervisor will be identified. You will also have a college advisor whom you may consult on issues concerning your personal wellbeing.

#### Assessment

##### Year one

There will be a set of on-course assessments, including formative essays. These will provide you with an opportunity to explore topics you find of interest and to practice essay-writing skills.

Formal assessment will normally comprise a three-hour written examination at the beginning of the third term for each foundation course; a three-hour written examination at the end of the third term and a research design essay, submitted in the

same term, for research methods; and two 5,000-word essays for the core course. You must pass all examinations to continue into Year 2. There is an opportunity to re-sit in September.

**Year two**

Formal assessment will comprise a three-hour examination for each option course at the end of the final term and the thesis, submitted at the beginning of the final term.

**Changes to courses**

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

**Expected length of course**

21 months

## Costs

### Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£17,275	£3,112	£20,387
Overseas	£22,810	£3,112	£25,922

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees and living costs. However, as part of your course requirements, you will need to choose a dissertation, a project or a thesis topic. Most students will choose a topic which will require them to do fieldwork for their thesis. This fieldwork will be conducted during the long vacation between the first and second year. Students should note that they will have to meet all costs of fieldwork themselves and these costs are likely to include travel and related costs such as visas, accommodation, subsistence, translation and research assistant services if required. These costs will vary according to the location and length of the fieldwork and the department estimates that these costs may range from £1,500 to £20,000. Each MPhil student is able to apply for a fieldwork grant of £700. This is awarded once only usually at the end of Trinity Term of their first year, before they go to the field during the summer vacation. Further information will be provided in the course handbook. You may also be able to apply for small grants from your college to help you cover some of these expenses.

## Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£258	£361	£2,318	£3,245	£3,090	£4,326
<b>Accommodation</b>	£536	£677	£4,824	£6,093	£6,432	£8,124
<b>Personal items</b>	£118	£263	£1,066	£2,364	£1,421	£3,152
<b>Social activities</b>	£41	£123	£369	£1,105	£492	£1,474
<b>Study costs</b>	£39	£85	£348	£765	£464	£1,020
<b>Other</b>	£22	£47	£202	£419	£269	£559
<b>Total</b>	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).
