

Course Information Sheet for entry in 2018-19

MSc by Research in Primary Health Care

About the course

The Nuffield Department of Primary Care Health Sciences' primary research focus is on the prevention, early diagnosis and management of common illness in general practice - particularly childhood infection, cancer, heart disease and stroke.

Applicants are strongly advised to visit the Medical Sciences Graduate School website to help them identify the most suitable course and supervisors.

The department has recently developed a new stream of clinical research which seeks to improve the conceptual understanding and use of monitoring in a number of chronic diseases. The department has an international reputation for developing innovative methods of research synthesis and research use to ensure that research findings change clinical practice.

Admission to the MSc by Research is highly competitive. The MSc by Research programme will provide you with strong training in the environment and a broad range of research areas and supervisor expertise. Previous research topics include:

- Cardiovascular disease risk factors, weight and the strategies to tackle future risk in school-aged children
- Developing paediatric quality indicators for UK general practice
- The evaluation and expansion of methodologies relating to the reporting and analyses of intermediate test results: improving the clinical utility of diagnostic research
- *Mycoplasma pneumoniae* and *Bordetella pertussis* in patients with persistent cough in primary care
- Incidence, prevention and treatment of acute coronary events in the elderly
- Infertility in the internet age: how women and men find information and support during treatment for infertility and sub-fertility
- Predictors of virologic treatment failure to Highly Active Anti-Retroviral Therapy (HAART) for HIV infection in the Western Cape Province, South Africa
- A primary care based intervention to improve participation in the NHS Bowel Cancer Screening Programme
- Predicting serious bacterial infections in children in primary health care

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

1 to 3 years

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£4,260	£3,112	£7,372
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2018-19 is £468, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
