

Course Information Sheet for entry in 2018-19

MSc in Archaeological Science

About the course

The MSc in Archaeological Science provides a broad introductory education for those with a first degree in archaeology wishing to apply science-based research methods, or for those with a first degree in a science subject wishing to learn about specifically archaeological issues amenable to scientific methods.

The MSc in Archaeological Science is designed to give a broad but detailed grounding in the theory as well as practical experience in the major applications of science in archaeology. It is intended for archaeologists or scientists who wish to go on to undertake research in archaeological science, or archaeologists who intend to pursue a career in the management of archaeological projects or become policy makers in this area and would like to have a sound understanding of the potential of science to elucidate archaeological problems. The MSc also acts as preliminary training for doctoral research.

The MSc in Archaeological Science is based on the research strengths of the Research Laboratory for Archaeology. The MSc consists of three elements taught over two nine-week terms, comprising materials analysis and the study of technological change, molecular bioarchaeology, and principles and practice of scientific dating, plus a five month research project chosen in consultation with the supervisor. The pre-set essay(s) and research project provide opportunity for specialisation within these areas.

Most students study all three archaeological science options, but it is possible to replace one of these with an option from the MSt in Archaeology or MSt in Classical Archaeology run by the school.

Each option has a co-ordinator who will be responsible for arranging your option teaching, while the course director has overall responsibility for your progress, and you will have a supervisor for your individual research project.

Teaching is through a combination of lectures, classes and laboratory sessions requiring regular written work, and is supplemented by a range of graduate seminars. The course benefits from the small size of the cohort (usually about eight, including both MSt and MSc), allowing many opportunities for student contribution. Class presentations are also required, providing valuable experience and the opportunity for feedback from your peers.

The archaeological science options are assessed in early May by written examination, plus a 10,000-word extended essay. Options taken from other master's degrees in archaeology are examined by a pair of 5,000-word pre-set essays, and the remaining options in archaeological science require only one 5,000 word pre-set essay. Students submit a 15,000- to 20,000-word dissertation on their research project in mid September.

A *viva voce* examination may be held and students' workbooks may also be examined at the discretion of the examiners.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

12 months

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£10,535	£3,112	£13,647
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees and living costs. However, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Please note that, depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
