

Course Information Sheet for entry in 2018-19

MSc in Environmental Change and Management

About the course

The MSc aims to give you a broad appreciation of the major processes of environmental change and of the people and institutions involved in environmental management. The course seeks to produce environmental leaders who are interdisciplinary and analytical in their approach to environmental issues, and competent and aware decision makers.

This course has three overarching aims, to:

- examine the nature, causes and impacts of major types of environmental change. How do these changes operate and interact on global, regional and local scales? How do they relate to critical social and ecological systems?
- examine the economic, legal, cultural, and ethical underpinnings of environmental responsibility and systemic solutions, including mitigation, adaptation, remediation, enhanced resource stewardship and other sustainable responses to environmental change at different scales and within different organisational contexts
- empower environmental leaders to address the world's most pressing environmental problems through an understanding of and training in the key analytical and practical skills, and in a broad appreciation of earth systems and societies in relation to environmental change.

These aims are pursued through an introductory course, Welcome to the Anthropocene, and seven core modules:

- The Earth System and its Fundamental Processes
- Ecosystems
- Human Systems and Environmental Change
- Environmental Economics and Policy
- Energy Systems and Climate Mitigation
- Sustainable Responses to Environmental Change
- Governing the Anthropocene.

Teaching takes place through lectures, seminars, workshops and field courses which provide in-depth exploration of key issues. The elective modules offer a tutorial-style teaching and discussion environment within smaller groups, based on a suite of contemporary research themes that reflect the specific interests of core faculty, research staff, and visiting scholars. The teaching aim is to foster knowledge, critical thinking, discussion and debate in an integrated setting, and to identify and explore theory, methods and practice in an academic space that encourages collaboration and critical dialogue. In the second year you will work on your thesis project with the support of a specialist supervisor.

Fieldwork and external visits are an important part of the teaching programme and currently include coastal and marine environmental change sites, local woodlands, Lake District National Park, the Centre for Alternative Technology (renewable energy and sustainability technologies) and a visit to the European Parliament.

The core modules are assessed by written examination. You will also study two electives, which are each assessed through a 4,000-word essay. You will also write an individual dissertation of 15,000 words.

Dissertation

An independent and original dissertation is an integral component of the course. In order to equip you with the necessary skills to undertake high quality research, a suite of training activities are offered to develop key transferable skills in order for you to be able to execute high quality independent and original research, and expose you to applied research methods used widely in academic and professional research.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

12 months

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£13,950	£3,112	£17,062
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees and living costs. However, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Please note that, depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

If you choose to attend an optional field trip to Brussels, you will need to fund your own travel and accommodation costs, which the department estimates will total around £200. You may be eligible to apply to the Environmental Change Institute for financial assistance for the Brussels field trip in the event of no other funding (eg college funding) being available.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
