

Course Information Sheet for entry in 2018-19

MSc in History of Science, Medicine and Technology

About the course

This specialist one-year course offers a range of options in the history of science, medicine and technology. You may specialise in the history of science and technology or the history of medicine, although the boundaries between these areas are deliberately permeable.

The history of science, medicine, and technology is a long-established discipline in Oxford. R. T. Gunther and Charles Singer were among the pioneers of the subject early in the twentieth century, and since the 1920s the Museum of the History of Science has housed an outstanding collection of scientific instruments and a fine specialist library. In the early 1970s, the creation of the chair of the history of science and the establishment of the Wellcome Unit for the History of Medicine gave the subject additional strength and allowed important new departures.

The expertise of scholars in Oxford covers most of the main areas and periods of the history of science, medicine, and technology. A varied programme of seminars, lectures, and conferences enables you to obtain knowledge of subjects beyond your chosen speciality and to meet visitors from elsewhere in Britain and abroad.

Teaching and examination comprise:

- two core qualifying papers, taught in classes during Michaelmas term, and reinforced by lectures on specific issues with formal assessment through a methodological essay of 3,000 words for each of the papers (one paper on methods and themes in the history of science and technology and one on methods and themes in the history of medicine);
- two advanced papers, usually taught in small classes and mostly during Hilary Term - assessment is usually by three-hour written examination, but you may choose to be assessed for one of their advanced papers by two extended essays of up to 5,000 words each
- a dissertation of not more than 15,000 words on a topic of your choice, approved by your supervisor, and submitted at the end of August.

Please note that not every optional subject listed may be on offer every year, depending in part on levels of student demand. Full details of core and optional papers available are available on the course webpage.

If you wish to apply for the DPhil you will be encouraged to develop your doctoral proposal during the first few months of the course, so that you will be well placed to make a doctoral application.

You should not apply to both the MSc and MPhil in this research area. Both courses have the same entry requirements.

More information about the MSc can be found in the course handbook.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

11 months

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£7,620	£3,112	£10,732
Overseas	£19,915	£3,112	£23,027

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees and living costs. However, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Please note that, depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
