

## Course Information Sheet for entry in 2018-19

### MSc in Integrated Immunology

#### About the course

The MSc in Integrated Immunology is designed to present immunology within the broader context of the basic sciences and biomedicine. Both the fundamental (basic) and clinical (applied) aspects are explored in depth and breadth, and integrated with relevant areas of other disciplines such as molecular cell biology, genetics and clinical trials, together with continuing professional development.

The University of Oxford is a world leader in Immunology. This means that you will be taught by leading academics in immunology throughout the first two terms of the MSc, and that you will undertake your third term project in a top-ranked research department.

The MSc in Integrated Immunology course provides comprehensive and in-depth training in immunology for science and medical postgraduates. It is a 12-month, full-time course comprising two taught terms followed by a 14-week laboratory-based research project within a University of Oxford laboratory. The first taught term focuses on the fundamental science of immunology, while the second explores the clinical and therapeutic aspects of immunology. The MSc course is not modular, ie all teaching elements are compulsory for all students and there are no options for students to choose.

Each of the two taught terms is 11 weeks in duration with nine weeks for classroom-based teaching, one for revision and one for examination. An average teaching week comprises approximately seven lectures, each lecture being 60 to 90 minutes in duration. In addition there are class directed learning sessions, tutorials and problem based learning sessions. Continuing professional development classes, including presentation and IT skills, statistics, ethics and clinical trial methodologies, take place throughout both taught terms.

In the third term you will undertake an original, supervised research project to gain an understanding of research techniques in immunology or a related area. Research supervisors provide regular supervision and guidance during the course of the research project.

At the end of each taught term, you will take a computer-based examination to test core knowledge. Further elements of the overall assessment are a critical essay in the first term, a set of clinical case commentaries in the second term, and a research dissertation in the third term. Detailed assessment instructions and marking criteria will be provided at the beginning of each term.

#### Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

#### Expected length of course

12 months

## Costs

### Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£4,260	£3,112	£7,372
Overseas	£32,895	£3,112	£36,007

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees and living costs. However, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Please note that, depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£258	£361	£2,318	£3,245	£3,090	£4,326
<b>Accommodation</b>	£536	£677	£4,824	£6,093	£6,432	£8,124
<b>Personal items</b>	£118	£263	£1,066	£2,364	£1,421	£3,152
<b>Social activities</b>	£41	£123	£369	£1,105	£492	£1,474
<b>Study costs</b>	£39	£85	£348	£765	£464	£1,020
<b>Other</b>	£22	£47	£202	£419	£269	£559
<b>Total</b>	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).
