

Course Information Sheet for entry in 2018-19

MSc in International Health and Tropical Medicine

About the course

The MSc in International Health and Tropical Medicine is a full-time one-year multidisciplinary and interdisciplinary programme examining major challenges to the health of populations in resource-limited contexts. The course is embedded within the Oxford Centre for Tropical Medicine and Global Health, Nuffield Department of Medicine.

The course aims to develop knowledge and understanding of the major global health problems in resource-limited settings and their potential solutions; knowledge and skills in research techniques applied in the analysis of global health problems, including quantitative and qualitative research methods, with opportunities for training in additional specialist fields; capacity to critically appraise evidence in global health; skills and practical experience in researching specific health problems in resource-limited contexts.

The first term will consist of core topics on research methods, an overview of some major global health challenges, and topics related to the research and practice of global health. Core modules include:

- Paradigms and Tools for Global Health (including epidemiology, statistics, health economics and social sciences for health)
- Challenges and Change in International Health
- Global Health Research and Practice

Core material will be assessed by two unseen papers in Week 0 of Trinity term.

During the second term, in addition to some continued core content, you can select two of the following six module options for further study:

- Vaccinology
- Reproductive, Maternal, Newborn and Child Health
- Case Studies in Field Epidemiology
- International Development and Health
- Development, Environment and Health
- Mathematical Modelling of Infection Diseases

You will submit two 3,000- to 4,000-word essays in early April, relating to your chosen optional modules.

The third term will most likely be based overseas and involve a funded eight week placement with a global health project in a resource limited setting. Projects represent the range of subjects covered in the course. The department has established a series of projects to choose from, hosted by the Oxford Tropical Network in various geographic regions. The research project will form the basis of a 10,000-word dissertation to be submitted eight weeks after return from placement.

Selected students who are medically qualified may be eligible to sit the Diploma in tropical medicine and hygiene examination run by the Royal College of Physicians.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

12 months

Costs

Annual fees for entry in 2018-19

Fee status	Tuition fee	College fee	Total annual fees
Home/EU (including Islands)	£13,950	£3,112	£17,062
Overseas	£32,895	£3,112	£36,007

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees and living costs. However, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Please note that, depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your tuition and college fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2018-19 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£258	£361	£2,318	£3,245	£3,090	£4,326
Accommodation	£536	£677	£4,824	£6,093	£6,432	£8,124
Personal items	£118	£263	£1,066	£2,364	£1,421	£3,152
Social activities	£41	£123	£369	£1,105	£492	£1,474
Study costs	£39	£85	£348	£765	£464	£1,020
Other	£22	£47	£202	£419	£269	£559
Total	£1,014	£1,556	£9,127	£13,991	£12,168	£18,655

When planning your finances for any future years of study at Oxford beyond 2018-19, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
