

## Course Information Sheet for entry in 2016-17

### DPhil in Education

#### About the course

The DPhil in Education is intended to provide graduates with a wide range of research skills, as well as in-depth knowledge, understanding and expertise in their chosen field of research.

The department's doctoral students develop their skills through a range of research methods and skills training courses in their first year. You will work closely with supervisors on literature review and study design for the thesis, and you are encouraged to make the most of the doctoral training and research methods provision available across the Social Sciences Division. At the heart of the skills provision is the Research Training Seminar, where students present and develop their research ideas and proposals with the benefit of feedback and support from their peers.

You can also join one or more of the department's research groups, becoming part of a vibrant educational research community with an active set of doctoral student-led events, seminars and conferences. All DPhil students are given opportunities to present their work at a variety of seminars and sessions in the department.

You will complete appropriate coursework tasks, and your academic progress is assessed at an interview at the end of the first year.

#### Changes to courses

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

#### Expected length of course

3 to 4 years (full time) or 6 to 8 years (part time, variable depending on progress)
