

Earth Sciences (Geology) Information Sheet for entry in 2016

The Earth Sciences are changing rapidly in scope and nature. The course at Oxford reflects these changes, and provides sound and broadly based scientific training. Students are trained in the skills required for the interpretation of rock materials and geological phenomena as well as applying theory and techniques from physics, chemistry, materials science and biology to the study of the Earth and the environment.

Earth Sciences at Oxford

The department has an international reputation, and houses state-of-the-art laboratories and computing facilities. Students, teachers and visitors mix and work together. Offices and teaching labs are close together but with plenty of shared open space, so you will become part of a vibrant community. This creates an atmosphere in which a student can not only learn the basics, but also get some feel for the discoveries emerging from current research.

The diversity of the subject is reflected in the range of courses which cover processes from the Earth's interior, as mapped by seismic waves, to the evolution of the Earth's crust documented in the rocks at the surface, to ocean and atmospheric circulation, through to the evolution of life on Earth.

Fieldwork/international opportunities

The Earth Sciences course includes several excursions. These link closely to material covered in lectures, and convey the practice of geology, geophysics, geochemistry, and palaeontology in the field environment. This work culminates in an independent project to study and map an area chosen by the student. Many of the field excursions take place out of term time, so students must be available outside term.

A typical weekly timetable

During years 1-3, your work is divided between lectures, tutorials, and practical classes. In year 4 you have the opportunity for independent work on special topics or in a research laboratory.

1st year

Courses

Students take all courses in five parallel streams:

- Planet Earth
- Fundamentals of geology I
- Fundamentals of geology II
- Physics, chemistry and biology for Earth Sciences

Assessment

First University Examinations
(Theory and Practical)

<p>4th year</p>	
<p>Research</p> <p>Students choose four options, generally two in each term (four / eight–ten):</p> <ul style="list-style-type: none"> • Anatomy of a mountain belt • Planetary chemistry • Seismology • Records of major environmental change in Earth's history • Palaeobiology • Environmental, rock and palaeo-magnetism • Topics in oceanography • Topics in volcanology <p>Field Courses</p> <p>Optional field courses as announced each year</p>	<p>Assessment</p> <p>Part B Examination (Theory)</p> <p>MEarthSc Hons (Earth Sciences)</p>

Independent work Research project over 2.5 terms	
---	--

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Fees

These annual fees are for full-time students who begin this undergraduate course here in 2016.

Fee Status	Tuition fee	College fee	Total annual fees
Home/EU	£9,000	£0	£9,000
Islands (Channel Islands & Isle of Man)	£9,000	£0	£9,000
Overseas	£22,515	£7,135	£29,650

Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Additional Fees and Charges Information for Earth Sciences (Geology)

Students are required to undertake field work in every year of this course: two trips in the first year and another two in the second year, then one trip in the third year and one more in the fourth year. Costs for these trips will be covered by the department.

You will also need to undertake a field mapping project in the vacation between the 2nd and 3rd year. The department will contribute £400 to each student, which is considered to be the minimum amount needed to do the project, probably based here in the UK. You are very welcome to go further afield if you prefer but you would need to find or raise any additional funding that you need.

Thanks to external donations, the department provides all field and safety equipment free of charge. The department will also provide first aid kits and additional safety equipment for the mapping project, for a small deposit which is returned to you when you return the equipment.

Living Costs

Your living costs will vary significantly dependent on your lifestyle. These are estimated to be between £970 and £1,433 per month in 2016-17. Undergraduate courses usually consist of three terms of eight weeks each, but as a guide you may wish to budget over a nine-month period to ensure you also have sufficient funds during the holidays to meet essential costs.

Living costs breakdown

	Per month		Total for 9 months	
	Lower range	Upper range	Lower range	Upper range
Food	£265	£298	£2,384	£2,673
Accommodation (including utilities)	£469	£667	£4,221	£6,002
Personal items	£119	£244	£1,073	£2,187
Social activities	£60	£107	£539	£960
Study costs	£36	£73	£314	£661
Other	£19	£44	£197	£410
Total	£970	£1,433	£8,727	£12,894
