

Course Information Sheet for entry in 2017-18

MSc in Biodiversity, Conservation and Management

About the course

The MSc in Biodiversity, Conservation and Management aims to provide a critical and conceptually sophisticated understanding of biodiversity science and the socio-economic, political, cultural and institutional environments within which management and policy decisions are made.

The course design is informed by the recognition that biodiversity conservation, as a domain of science and policy, needs to become more contextual and multi-level in its conception. The course content is rooted in our established strengths in conservation biogeography, strategy and governance and in research design. The course design also responds to the rise of market-based conservation including engagements with enterprise and the transformative potential of new technologies.

The specific course objectives are to develop your abilities to:

- critically engage with concepts and theory in biodiversity science and management from interdisciplinary perspectives and at an advanced level
- describe by whom and by what space and territory is produced and governed in conservation over time
- critically assess the modes through which conservation builds and extends power and describe in detail the factors that explain the emergence and performance of different governance modes;
- appreciate the role of ethics, values and norms in producing culturally attuned and effective conservation interventions
- embrace the implications of new technological forces for the future of biodiversity science and management
- link theory, hypothesis, methods, data and field work so as to identify and develop advanced research questions and design.

The objectives are delivered through nine core modules, covering conservation landscapes, conservation biogeography, conservation governance, ecosystems, biodiversity informatics, conservation and society, environmental economics and policy, and research design and research methods.

The core modules are assessed by written examination. You will also study two electives which are each assessed through a 4,000-word essay. You will also write a dissertation of 15,000 words.

Elective modules

These offer a tutorial-style teaching and discussion environment within smaller groups, based on a suite of contemporary research themes that reflect the specific interests of core faculty and visiting research associates. The teaching aim is to foster discussion and debate between academic staff and

students to identify and explore theory, methods and practice in an academic space that encourages a critical dialogue.

Dissertation

An independent and original dissertation is an integral component of the course. In order to equip you with the necessary skills to undertake high quality research, course modules in research design and research methods teach skills and competences in a suite of common and emerging research practices and methods employed in biodiversity science, policy and management research.

Changes to courses

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

12 months

Annual fees for entry in 2017-2018

Fee Status	Tuition fee	College fee	Total annual fees
Home/EU (including islands)	£13,545	£3,021	£16,566
Overseas	£19,335	£3,021	£22,356

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

Most costs associated with compulsory fieldwork are paid for by the department. This excludes the costs associated with obtaining the appropriate visa required to attend the non-UK based field trips. Non-EEA nationals might require a visa in order to travel to the country where the field trip is being held and any costs associated with obtaining the appropriate travel visa is the responsibility of the student. Students will also have to pay for some meals during the field course.

Furthermore, as part of your course requirements you need to develop and research a dissertation topic. Depending on your choice of topic and the field work research required to complete it, you may incur additional costs (eg relating to travel, accommodation, field assistants, lab fees and/or research visas). You will need to meet these additional costs, although you may be able to apply for

small grants/bursaries from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2017-18 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£250	£350	£2,250	£3,150	£3,000	£4,000
Accommodation	£538	£619	£4,844	£5,569	£6,459	£7,425
Personal items	£115	£255	£1,035	£2,295	£1,380	£3,060
Social activities	£40	£119	£358	£1,073	£477	£1,431
Study costs	£38	£83	£338	£743	£451	£991
Other	£22	£45	£196	£407	£261	£543
Total	£1,002	£1,471	£9,021	£13,237	£12,028	£17,649

When planning your finances for any future years of study in Oxford beyond 2017-18, you should allow for an estimated increase in living expenses of 2% each year.

More information about how these figures have been calculated is available at www.ox.ac.uk/admissions/graduate/fees-and-funding/living-costs.
