

Course Information Sheet for entry in 2016-17

MSc in Environmental Change and Management

About the course

The MSc aims to give you a broad appreciation of all aspects of the management of people and institutions in relation to environmental change, you will become analytical in your approach, and a competent and aware decision maker. The MSc emphasises cross-cutting, interdisciplinary approaches to the critical environmental problems of our time.

This course has three overarching aims, to:

examine the nature, causes and impacts of major types of environmental change. How do these changes operate and interact on global, regional and local scales? How do they relate to critical social and ecological systems?

examine the economic, legal, cultural, and ethical underpinnings of environmental responsibility and systemic solutions, including mitigation, adaptation, remediation, enhanced resource stewardship and other sustainable responses to environmental change at different scales and within different organisational contexts

empower environmental leaders to address the world's most pressing environmental problems through an understanding of and training in the key analytical and practical skills, and in a broad appreciation of earth systems and societies in relation to environmental change.

These aims are pursued through an introductory course, 'Welcome to the Anthropocene', and seven core modules: 'The Earth system and its fundamental processes', 'Ecosystems', 'Human systems and environmental change', 'Environmental economics and policy', 'Energy systems and climate mitigation', 'Sustainable responses to environmental change' and 'Governing the Anthropocene'.

These core modules are supported by training in specialist skills including, for example, environmental modelling, GIS, cost-benefit, risk & life cycle analyses. Fieldwork and external visits are an important part of the teaching programme and include coastal and marine environmental change sites, renewable energy technologies and a visit to the European Parliament.

The core modules are assessed by written examination. You will also study two electives which are each assessed through a 4,000-word essay. You will also write an individual dissertation of 15,000 words.

Elective modules

These offer a tutorial-style teaching and discussion environment within smaller groups, based on a suite of contemporary research themes that reflect the specific interests of core faculty and visiting research associates. The teaching aim is to foster discussion and debate between academic staff and students to identify and explore theory, methods and practice in an academic space that encourages a critical dialogue.

Dissertation

An independent and original dissertation is an integral component of the course. In order to equip you with the necessary skills to undertake high quality research, a suite of training activities are offered to develop key transferable skills in order for you to be able to execute high quality independent and original research, and expose you to applied research methods used widely in academic and professional research.

Changes to courses

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

12 months

Annual fees for entry in 2016-2017

Fee Status	Tuition fee	College fee	Total annual fees
Home/EU (including islands)	£13,150	£2,933	£16,083
Overseas	£18,770	£2,933	£21,703

The fees shown above are the annual tuition and college fees for this course for entry in the 2016-17 academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. For details, please see our guidance on likely increases to fees and charges.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

All costs associated with compulsory fieldwork are paid for by the department. If you are following the Environmental Change and Management route to the MPhil, you will need to fund your own travel and accommodation costs for an optional field trip to Brussels, which the department estimates will total around £200. You may be eligible to apply to the Environmental Change Institute for financial assistance for the Brussels field trip in the event of no other funding (eg college funding) being available.

Living costs

In addition to your fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2016-17 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£265	£298	£2,384	£2,673	£3,177	£3,565
Accommodation	£469	£667	£4,221	£6,002	£5,627	£8,006
Personal items	£119	£244	£1,073	£2,187	£1,429	£2,915
Social activities	£60	£107	£539	£960	£718	£1,280
Study costs	£36	£73	£314	£661	£418	£880
Other	£19	£44	£197	£410	£265	£547
Total	£970	£1,433	£8,727	£12,894	£11,636	£17,191

When planning your finances for any future years of study in Oxford beyond 2016-17, you should allow for an estimated increase in living expenses of 2% each year.

More information about how these figures have been calculated is available at www.ox.ac.uk/admissions/graduate/fees-and-funding/living-costs.
