

## Course Information Sheet for entry in 2016-17

### MSc in Medical Anthropology

#### About the course

This one-year course offers a coordinated learning programme in both social and biological anthropological approaches to health and illness. It provides the necessary basis for future anthropological research and an excellent cross-cultural grounding for those aiming to pursue a career in anthropology, global health or other health-related fields.

The MSc consists of four papers which you will take in June, and a 10,000-word dissertation which you will submit in late August. The three core papers, taught across Michaelmas and Hilary Terms, each comprise 16 lectures, three tutorials and one debate. You will also select an option paper, which may have a topical or regional focus, based on your own interests. The core papers are as follows:

Paper 1: Concepts of disease, illness, health and medicine in global perspective

Paper 2: Theory and practice of bio-medicine and of other medical systems

Paper 3: Critical medical anthropology

There are two core seminar series in medical anthropology, the Fertility and Reproduction Seminars in Michaelmas term and the Medical Anthropology Research Seminars.

The dissertation is an independent piece of work written after the June examinations. Dissertation classes are held over the first four weeks of Trinity term for two hours per week, during which you will be able to present ideas for your dissertation project to colleagues and staff, and a maximum of two individual supervisors.
