

Course Information Sheet for entry in 2016-17

MSt in Archaeological Science

About the course

The MSt in Archaeological Science provides a broad introductory education for those with a first degree in archaeology wishing to apply science-based research methods, or for those with a first degree in a science subject wishing to learn about specifically archaeological issues amenable to scientific methods.

The MSt in Archaeological Science is designed to give a broad but detailed grounding in the theory as well as practical experience in the major applications of science in archaeology, particularly for archaeologists who intend to pursue a career in archaeological project management or become policy makers in this area.

The MSt in Archaeological Science is based on the research strengths of the Research Laboratory for Archaeology. The MSt consists of three taught elements taught over two nine-week terms, comprising materials analysis and the study of technological change, molecular bioarchaeology, and principles and practice of scientific dating, plus a 5,000-word report on a practical project chosen in consultation with the supervisor. The pre-set essay(s) and practical project provide opportunity for specialisation within these areas.

Most students study all three archaeological science options, but it is possible to replace one of these with an option from the Master's in Archaeology or the Master's in Classical Archaeology run by the department. Students can also supplement the course by attending teaching in another course in preparation for the extended essay. One option which provides very useful supplementary skills is the Practical Archaeobotany option from the MSt in Archaeology.

Each option has a co-ordinator who will be responsible for arranging your option teaching, while the course director has overall responsibility for your progress, and you will have a supervisor for your individual practical project.

Teaching is through a combination of lectures, classes and laboratory sessions requiring regular written work, and is supplemented by a range of graduate seminars. The course benefits from the small size of the cohort (usually about eight, including both MSt and MSc), allowing many opportunities for student participation. Class presentations are also required, providing valuable experience and the opportunity for feedback from your peers.

The archaeological science options are assessed in early May by written examination, plus either a 10,000-word extended essay or two 5,000-word pre-set essays. Options taken from other master's degrees in archaeology are examined by a pair of 5,000-word pre-set essays, and the remaining options in archaeological science require only one 5,000-word pre-set essay. The practical project is of approximately six weeks duration, over May and June, culminating in a 5,000-word report.

A viva voce examination may be held, when candidates' work-books may also be examined, at the discretion of the examiners.

Changes to courses

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

9 months

Annual fees for entry in 2016-2017

Fee Status	Tuition fee	College fee	Total annual fees
Home/EU (including islands)	£7,185	£2,933	£10,118
Overseas	£16,280	£2,933	£19,213

The fees shown above are the annual tuition and college fees for this course for entry in the 2016-17 academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. For details, please see our guidance on likely increases to fees and charges.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees and living costs. However, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Please note that, depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2016-17 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£265	£298	£2,384	£2,673	£3,177	£3,565
Accommodation	£469	£667	£4,221	£6,002	£5,627	£8,006
Personal items	£119	£244	£1,073	£2,187	£1,429	£2,915
Social activities	£60	£107	£539	£960	£718	£1,280
Study costs	£36	£73	£314	£661	£418	£880
Other	£19	£44	£197	£410	£265	£547
Total	£970	£1,433	£8,727	£12,894	£11,636	£17,191

When planning your finances for any future years of study in Oxford beyond 2016-17, you should allow for an estimated increase in living expenses of 2% each year.

More information about how these figures have been calculated is available at www.ox.ac.uk/admissions/graduate/fees-and-funding/living-costs.
