Medicine (graduate-entry/accelerated) Course Information Sheet for entry in 2023

This course is an intensive four year medical course and has been designed for graduates who are trained in applied or experimental sciences.

The practice of Medicine offers a breadth of experiences impossible to find in any other subject. Every day brings different patients with different needs. It's a great choice for scientists who strive to understand and apply research findings to improve the lives of the patients in their care. It offers a meaningful career that is prestigious, secure and relatively well paid.

However, practising Medicine can be arduous, stressful, frustrating and bureaucratic and it's not suited to everyone. You need to be sure that Medicine is the right choice for you. These pages will help you work that out, but there's no better way to find out for sure than by gaining insight of medical practice by seeing it in action and talking to those who provide healthcare. Studying Medicine because that is what is expected of you is never a good idea: make sure that your motives for choosing to do so are well reasoned.

The four-year graduate-entry/ accelerated course (UCAS code A101 BMBCh4) is open to graduates who already have a [degree in an experimental science subject](#).

After a two-year transition phase covering basic science and clinical skills, the accelerated programme leads into the final two years of the standard course and to the same Oxford medical qualification as the standard (six-year) course. The four-year course is designed specifically for science graduates, and places a strong emphasis on the scientific basis of medical practice.

The first year

The first year of the course builds on your science background to cover most of the basic science that is needed for medicine, as well as essential clinical skills such as taking a clinical history and performing a basic physical examination. The aims of this year are for you to cover the core of medical science and clinical skills in which all medical students must be competent, to understand the application of science to clinical practice, and to gain experience in applying science and clinical skills to the process of diagnostic problem-solving.

The second year

The second year builds on the basic science and clinical skills of the first year and leads to periods of more intensive clinical practice. By the end of this year, you should be able to recognise common disease patterns in medicine and surgery and be capable of reaching a diagnosis of the commoner illnesses. You should also be able to plan first-line clinical investigations. A nine-week clinical pathology ("Laboratory Medicine") block is interspersed with the clinical attachments. The science

University Offices, Wellington Square, Oxford OX1 2JD

teaching continues throughout the year, oriented more directly towards clinical practice. You will be expected to review clinical trials and clinical research reports, and to appraise the application of such reports to clinical practice.

The third year

For the final two years you will be fully integrated into the main stream of the standard clinical course. The third year consists of a series of attachments to clinical specialties such as orthopaedics, paediatrics and psychiatry. The aim of this year is to provide an overview of the major specialties within medicine, to allow you to recognize common complaints and to develop an understanding of when it is appropriate to refer a patient for specialist treatment. You can read more about this year of study on the [clinical course pages of the Study Medicine website](#).

The fourth year

The final year of the course is designed to prepare you for life after qualification, with teaching specifically aimed at practical matters of diagnosis and management. During the year there are also opportunities for special study, with blocks set aside for you to pursue areas of particular academic interest (normally this takes place within Oxford), and a ten-week elective period, which most students choose to take overseas. The final examination is in February of the final year, allowing several months before the formal end of the course for you to concentrate on preparing for practice in your Foundation Years. You can read more about this year of study on the [clinical course pages of the Study Medicine website](#).

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's [Terms and Conditions](#).

Fees

These annual fees are for full-time students who begin this undergraduate course here in 2023.

Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Please note that while the University sets out its annual fees as a single figure, this is a combined figure for both your University and college fees. More information is provided in your [Terms and Conditions](#).

Year 1 students

Fee status	Annual Course fees
Home (UK, Republic of Ireland,	£9,250

UNDERGRADUATE ADMISSIONS AND OUTREACH

University Offices, Wellington Square, Oxford OX1 2JD

<u>Fee status</u>	Annual Course fees
Channel Islands & Isle of Man)	
Overseas (including most EU students– see Note below)	£39,740

Pre-clinical fees are charged in year 1 of the graduate-entry/ accelerated course (A101), although there are clinical elements of study throughout the course.

Fees for the later years have not yet been confirmed but please note that these may be different from the pre-clinical fees. Clinical fees are charged in years 2 to 4 of the graduate-entry/ accelerated course (A101). As a guide, these are the annual fees for students who will complete the pre-clinical stage of their course and progress to the clinical years in 2023.

Year 2, 3 and 4 students

<u>Fee status</u>	Annual Course fees
Home (UK, Republic of Ireland, Channel Islands & Isle of Man)	£9,250
Overseas (including most EU students– see Note below)	£52,490

Note: Irish nationals living in the UK or Ireland, EU, other EEA, and Swiss nationals who have been granted settled or pre-settled status in the UK under the EU settlement scheme are eligible for 'Home fee' status and student loan support, subject to meeting residency requirements. We will contact you directly if we need further information from you to determine your fee status.

Please refer to the [Undergraduate fee status](#) pages for more information.

Living costs

Living costs for the academic year starting in 2023 are estimated to be between £1,290 and £1,840 for each month you are in Oxford. Our academic year is made up of three eight-week terms, so you would not usually need to be in Oxford for much more than six months of the year but may wish to budget over a nine-month period to ensure you also have sufficient funds during the holidays to meet essential costs.

Living costs breakdown

	Per month		Total for 9 months	
	Lower range	Upper range	Lower range	Upper range
Food	£300	£470	£2,700	£4,230
Accommodation (including utilities)	£715	£860	£6,435	£7,740

UNDERGRADUATE ADMISSIONS AND OUTREACH

University Offices, Wellington Square, Oxford OX1 2JD

	Per month		Total for 9 months	
Personal items	£180	£305	£1,620	£2,745
Social activities	£40	£90	£360	£810
Study costs	£35	£80	£315	£720
Other	£20	£35	£180	£315
Total	£1,290	£1,840	£11,610	£16,560

In order to provide these likely living costs (which are rounded to the nearest £5), the University and the Oxford SU conducted a living costs survey to complement existing student expenditure data from a variety of sources, including the UK government's Student Income and Expenditure Survey and the National Union of Students (NUS).

You should make allowances for expected increases in living costs because of inflation. During March to September last year (2022) inflation in the UK was between 7% and 10%.

[Additional Fees and Charges Information for Graduate-entry Medicine](#)

The Graduate-entry Medicine course has extended terms. This means that you will need to budget for slightly higher living costs in all years, but especially in Years 2-4, as you will be required to be in Oxford for longer than the standard term. (See the [likely range of living costs](#) for an additional month in Oxford.)

Year 1 – 30 weeks

Year 2 – 40 weeks

Year 3 – 48 weeks

Year 4 – 48 weeks, including 10 weeks elective study (see below)

For more information about fees and funding for this course, please see [Funding for UK/EU Medical Students](#).

[Elective study](#)

Each final year student has a period of 10 weeks for elective study within the overall 48 weeks of the course. (This is year 4 for A101 students.) Your elective study may be conducted in Oxford, elsewhere in the UK, or anywhere in the world provided the content of the placement is appropriate experience for medicine. Approval must be granted by the Director of Clinical Studies. A student who stays in Oxford for their elective would be expected to incur no additional costs apart from their living costs. Many students opt to travel outside the UK in which case the additional cost is on average around £3,000, but may be lower or higher depending on location (very occasionally a student has spent up to £9,000.) Students who have not completed the core training in clinical medicine may be required to follow a prescribed course of study in Oxford for all or part of their 10 week elective instead of arranging a placement. There are opportunities to apply for additional

financial support which varies depending on the destination proposed. This support is usually around £300 to £500 towards travel costs.
