

## Course Information Sheet for entry in 2016-17

### PGDip in International Wildlife Conservation Practice

#### About the course

This is an eight month full-time course focusing on the global dimensions of wildlife conservation, and the survey and analysis methods commonly used in the study of terrestrial mammals.

The Recanati-Kaplan Centre Postgraduate Diploma in International Wildlife Conservation Practice is designed to enhance the skills of conservation practitioners by teaching field, analytical and reporting techniques necessary for effective conservation research and action.

The course is delivered by the Department of Zoology's Wildlife Conservation Research Unit (WildCRU), which has been active in conservation research and practice for more than two decades. The course is made possible by a donation from the Recanati-Kaplan Foundation, and is jointly managed with the Department for Continuing Education.

The focus of the course is on methods commonly used in the study of large mammals, and especially carnivores, in the developing world. The curriculum consists of modules on wildlife ecology, monitoring and survey techniques, GIS and habitat assessment, population management and statistics, as well as two independent research projects. The mode of teaching involves lectures, group discussions, technical practicals on the use of computer software, field sessions and individual tutorials.

The independent research projects concentrate on the organisation, analysis and reporting of previously collected data that you bring with you or is provided by WildCRU researchers. There is no time to undertake primary data collection in country or abroad during the course duration. Unifying threads running through the course are the global and human dimensions of biodiversity conservation. You will learn both the theory and practical aspects of field techniques, so that you can confidently adopt them in the future, as well as critically evaluate other projects.

Assessment is through the two project reports and four assignments. The project reports will be a maximum of 7,000 words, and each worth 30% of your final mark. The assignments will be up to 2,000 words, and each worth 10% of your final mark. Most module assignments will be short-answer questions, presenting data to be analysed, scientific research to critique, a problem for which you will design solutions, or information to be synthesised into a brief report/recommendation.

Up to eight students are accepted each year and applications are particularly welcomed from conservationists working in economically less-developed parts of the world, for whom need-based scholarships are available. Suitable candidates are early-career field conservationists, working with government agencies or NGOs, who will implement and disseminate their skills to their home countries.

#### Changes to courses

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make

changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

### **Expected length of course**

8 months

### **Annual fees for entry in 2016-2017**

Fee Status	Tuition fee	College fee	Total annual fees
Home/EU (including islands)	£10,750	N/A	£10,750
Overseas	£10,750	N/A	£10,750

The fees shown above are the annual tuition fees for this course for entry in the 2016-17 academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. For details, please see our guidance on likely increases to fees and charges. College fees are not generally payable for non-matriculated courses although a small number of courses may permit college affiliation for which a charge will be made.

Tuition fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition fees).

### **Additional cost information**

This course is residential near Oxford, so you will need to meet your travel and accommodation costs; however, grants are available covering fees, accommodation and travel. Please see the course page on the department's website for further details.

## Living costs

**In addition to your fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.**

The likely living costs for 2016-17 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£265	£298	£2,384	£2,673	£3,177	£3,565
<b>Accommodation</b>	£469	£667	£4,221	£6,002	£5,627	£8,006
<b>Personal items</b>	£119	£244	£1,073	£2,187	£1,429	£2,915
<b>Social activities</b>	£60	£107	£539	£960	£718	£1,280
<b>Study costs</b>	£36	£73	£314	£661	£418	£880
<b>Other</b>	£19	£44	£197	£410	£265	£547
<b>Total</b>	£970	£1,433	£8,727	£12,894	£11,636	£17,191

When planning your finances for any future years of study in Oxford beyond 2016-17, you should allow for an estimated increase in living expenses of 2% each year.

More information about how these figures have been calculated is available at [www.ox.ac.uk/admissions/graduate/fees-and-funding/living-costs](http://www.ox.ac.uk/admissions/graduate/fees-and-funding/living-costs).
