

Transition Support Package: A100 Medicine

There is no need for you to undertake any work before you come to Oxford unless you have been asked to by your college tutors. However, if you do want to get ahead or feel it would ease your transition to read up a little beforehand, we suggest the following as good starting points.

Mackinnon, P. C. B. & Morris, J. F. (2005) *Oxford Textbook of Functional Anatomy*. Oxford University Press.

Ross, M. H. & Pawlina, W. (2015) *Histology: a text and atlas: with correlated cell and molecular biology*. Wolters Kluwer.

Alberts, B. *et al* (2014) *Molecular biology of the cell*. Garland.

Schoenwolf, G. C. *et al* (2021) *Larsen's human embryology*. Elsevier.

Laycock, J. F. & Meeran, K. (2013) *Integrated endocrinology*. Wiley.

Boron, W. F. & Boulpaep, E. L. (2017) *Medical physiology*. Elsevier.

Keynes, R. D. *et al* (2011) *Nerve and muscle*. Cambridge University Press.

West, J. B. & Luks, A. (2016) *West's respiratory physiology*. LWW.

Ritter, J. *et al* (2020) *Rang and Dale's pharmacology*. Elsevier.

Lehninger, A. L. *et al* (2021) *Lehninger principles of biochemistry*. W. H. Freeman & co.

Wilkins, R. J. *et al* (2021) *Oxford handbook of medical physiology*. Oxford University Press.

Berg, J. M. *et al* (2019) *Biochemistry*. W. H. Freeman & co.
