

Course Information Sheet for entry in 2020-21

DPhil in Cancer Science

About the course

This DPhil programme is for basic science graduates, clinical students and trainee clinicians who want to undertake advanced study in the field of cancer research. The programme provides a solid grounding in the study of oncology and cancer biology through the provision of advanced level seminars in the first year and subject specific training in your host department.

As a doctoral student on the programme, you will carry out research in a single laboratory for three to four years on a full-time basis. There is no period of rotation between laboratories. All doctoral students develop their skills through a range of research training and skills development in their first year of full-time study, by attending compulsory and optional courses and lectures in laboratory techniques and generic skills, including scientific writing and statistics, while also carrying out your research project.

You will be encouraged to attend lectures and seminars related to your programme of research and make the most of the doctoral training and research methods provision available across the University. The aim is to tailor this training to individual needs and bring all students up to an advanced level in background knowledge. Later training is focused on the skills required for a successful career in independent research and for clinicians, to successful re-integration into clinical training.

This course has three different tracks and your application will be considered for the track that is most appropriate to your previous study and/or employment. Clinical trainees (track 1) and medical undergraduates (track 2) will enrol on a three-year programme. Non-clinical/fundamental scientists (track 3) will enrol on a four-year programme. Students are admitted directly to work under the supervision of a Principal Investigator who is formally appointed as the DPhil supervisor. Students are based in a research group/laboratory to undertake one of the research projects advertised.

Students begin the DPhil in Cancer Science programme as a probationary research student (PRS). Before the end of their fourth term, students are required to write a report prior to transfer to DPhil status. Progress is evaluated by two academic assessors, who are not directly involved in the student's supervision. Continuation on the DPhil programme is subject to passing the Transfer of Status assessment in year 2 or 3. The doctoral work will culminate in a thesis that will be defended in an oral examination (*viva voce*). Students are expected to submit their thesis between the ninth and twelfth terms from being admitted as a PRS.

Supervision

The allocation of graduate supervision is the responsibility of the Medical Sciences Doctoral Training Centre and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Medical Sciences Doctoral Training Centre.

Graduate destination

DPhil in Cancer Science is a new course for entry in 2020, but historically, postgraduate cancer research students follow a wide variety of career paths, including all branches of biomedical research, clinical medicine, teaching, health administration and commerce. Further information about alumni destinations for cancer research students can be found on the Cancer Research UK Oxford Centre website.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

Mode of study	Full Time Only
Expected length	3 to 4 years

Costs

Annual fees for entry in 2020-21

Fee status	Annual Course fees
Home/EU (including Islands)	£7,970
Overseas	£26,405

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2020-21 is £508, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2020-21 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£270	£385	£2,430	£3,465	£3,240	£4,620
Accommodation	£630	£760	£5,670	£6,840	£7,560	£9,120
Personal items	£130	£245	£1,170	£2,205	£1,560	£2,940
Social activities	£45	£110	£405	£990	£540	£1,320
Study costs	£40	£95	£360	£855	£480	£1,140
Other	£20	£55	£180	£495	£240	£660
Total	£1,135	£1,650	£10,215	£14,850	£13,620	£19,800

When planning your finances for any future years of study at Oxford beyond 2020-21, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
