

Course Information Sheet for entry in 2020-21

DPhil in International Relations

About the course

The DPhil programme is a full-time programme of doctoral research in the academic study of International Relations with an expected length of three to four years of full-time study or six to eight years of part-time study.

As a DPhil student you will be a member of a distinguished academic community that is renowned for its cutting-edge research and its intensive and individualised teaching and supervision. The programme has received the highest level of recognition in UK national and global assessment exercises. It is a community from which you will draw support and guidance but which will also learn from your own contribution to its work.

You will have rich opportunities for connecting with fellow-students, postdoctoral fellows, and temporary and permanent academic staff involved in disciplinary and cross-disciplinary research programmes. The department attracts many of the world's leading figures in International Relations (IR) - as visiting scholars, speakers in the regular IR Colloquium, and participants in research conferences and workshops.

Doctoral students spend the first year of full-time study, or the first two years of part-time study, in the development of, and early work on, the thesis topic; in improving knowledge of quantitative and qualitative research methods; in attendance at relevant lectures, seminars and classes; and in preparing to transfer from Probationary Research Student (PRS) to full DPhil status.

You will be assigned an Academic Supervisor who will advise and guide you as you progress through the different stages of your doctoral research. The department also appoints a departmental assessor who takes the lead on the two internal assessments that doctoral students have to pass prior to the final submission of the thesis. Your college will also assign you an adviser upon whose general pastoral advice and support you will be able to call.

In addition to work for your supervisor, you will be required to take a range of coursework. In the first term this includes: Research Design and Methods, Advanced IR Theory, and basic or intermediate statistics, as well as attendance at the regular IR DPhil Research Seminar which runs through the year and at which doctoral students present their work. In the second term students continue with Research Design and Approaches to Research in IR and take one of Formal Analysis, Causal Inference, Qualitative Methods, or Reasoning in Political Theory. In the third term, there are a series of short, specialised methods courses. For part-time students, these coursework obligations are distributed across six terms. Exemptions from particular elements of the coursework can be sought on the basis of previous training. PRS students are required to pass the assessments set in the above courses. Subsequent years are largely devoted to the development of the thesis project.

Doctoral theses will normally require substantial original research, often involving archives, fieldwork, interviewing or other forms of data generation and collection. For the doctoral degree the most crucial requirement is that the thesis makes a 'significant and substantial contribution to the field of knowledge within which it falls'. There are many ways of achieving this.

The department is committed to the rigorous use of a plurality of methods. There are many different ways of conducting research for a thesis. Any or all may be valid in a given case, depending on the subject of the research and the questions addressed. Some theses may involve an analytical-descriptive attempt at understanding different events, perspectives and traditions of thought. Others may have a strong historiographical element – exploring, for example, the relation between events and ideas, or involving an original and expert use of sources. Others may involve advancing a hypothesis about a subject and then testing it with a range of qualitative and/or quantitative approaches. Apart from meeting the highest scholarly standards, there is no set template. There is also a strong and successful tradition of normative and critical work. Oxford IR seeks to combine the best of North American political science with deep engagement with the international relations of different parts of the world and with the history of different traditions of thought on the subject.

As a doctoral student of the department, you will have access to outstanding library and computing resources within the Social Sciences Division (of which the Department of Politics and IR is a major part), elsewhere in the University and, in most cases, in your college. The Division runs network events to enable DPhil students to meet and network with their colleagues not only within Politics and IR but with other social science disciplines.

Successful completion of an Oxford DPhil requires an intense and sustained level of personal motivation and focus within a world-class research and teaching environment.

Supervision

The allocation of graduate supervision for this course is the responsibility of the Department of Politics and International Relations and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Department of Politics and International Relations.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

Mode of study	Full Time	Part Time
Expected length	3-4 years	6-8 years

Costs

Annual fees for entry in 2020-21

Full-time study

Fee status	Annual Course fees
Home/EU (including Islands)	£13,075
Overseas	£24,910

Part-time study

Fee status	Annual Course fees
Home/EU (including Islands)	£6,540
Overseas	£12,455

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2020-21 is £508, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

Full-time study

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel and vaccination expenses, conference attendance, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Part-time study

Please note that you are required to attend in Oxford for a minimum of 30 days each year, and you may incur additional travel and accommodation expenses for this. Also, depending on your choice of research topic and the research required to complete it, you may incur further additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

If you are studying part-time your living costs may vary depending on your personal circumstances but you must still ensure that you will have sufficient funding to meet these costs for the duration of your course.

The likely living costs for 2020-21 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£270	£385	£2,430	£3,465	£3,240	£4,620
Accommodation	£630	£760	£5,670	£6,840	£7,560	£9,120
Personal items	£130	£245	£1,170	£2,205	£1,560	£2,940
Social activities	£45	£110	£405	£990	£540	£1,320
Study costs	£40	£95	£360	£855	£480	£1,140
Other	£20	£55	£180	£495	£240	£660
Total	£1,135	£1,650	£10,215	£14,850	£13,620	£19,800

When planning your finances for any future years of study at Oxford beyond 2020-21, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
