

## Course Information Sheet for entry in 2019-20

### DPhil in Medical Sciences

#### About the course

Based in the Radcliffe Department of Medicine, this DPhil research programme is aimed at basic scientists and clinicians with an interest in pursuing research in a scientific field related to medicine, particularly in cardiovascular medicine, diabetes, endocrinology and metabolism, epidemiology and clinical trials, haematology and pathology, immunology, regenerative medicine and stem cells, and acute stroke.

Applicants are strongly advised to visit the Medical Sciences Graduate School website to help them identify the most suitable course and supervisors.

You will be admitted directly onto a research project with one of RDM's world-leading scientists, who will act as your supervisor. In most cases, students choose a project from our advertised project list, but in some cases students design their own project in collaboration with their proposed supervisor. In either case, you will be expected to play an active role in shaping your project over the course of the DPhil. Graduate students are a valuable part of the department and they are encouraged to be involved with the scientific and social life of the department at all levels.

Your project and development during your DPhil studies will be guided by a specialised team led by your academic supervisor. Most students also have one or more formal co-supervisors, who can provide additional scientific advice on their specialist areas and who will offer another viewpoint on the student's project. Together, they form the specialised team that will advise you on your academic progress. If you don't have a formal co-supervisor, you will have a nominated secondary supervisor, who you can always ask for advice, but who will not be actively involved with your project on a day-to-day basis.

As well as your supervisor, you will have the support of a Graduate Advisor, the Director of Graduate Studies and the Graduate Studies Administrator. All activity relating to graduate students within the department is overseen by the Graduate Studies Committee.

Your training will be tailored to your particular needs, drawing from the vast range of training available at Oxford and covering both specialist scientific methods and techniques and transferable skills. Please note that there is no formal taught component of the DPhil in Medical Sciences.

Much of your training will take place in the lab, where you will be trained by your supervisor or members of the lab team in the variety of techniques and protocols used. A brief statement of the training you will receive in the lab is included in the training description of your chosen project.

As a member of the Medical Sciences Graduate School you will be entitled to enrol on courses run by Medical Sciences Skills Training. You will be able to attend the wide variety of sessions covered through the MRC Weatherall Institute of Molecular Medicine (WIMM) Methods and Techniques course, and if your research is on a topic related to cardiovascular medicine you will be able to benefit from the British Heart Foundation Centre of Research Excellence hosted by the University. RDM also runs a successful mentoring scheme, which all students are encouraged to join.

#### Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

#### Expected length of course

3 to 4 years

## Costs

### Annual fees for entry in 2019-20

Fee status	Annual Course fees
Home/EU (including Islands)	£7,665
Overseas	£23,950

The fees shown above are the annual course fees for this course, for entry in the stated academic year.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional information section below, course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information below.

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. For details, please see our guidance on likely increases to fees and charges.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2019-20 is £488, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2019-20 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£265	£371	£2,387	£3,342	£3,183	£4,456
<b>Accommodation</b>	£566	£739	£5,093	£6,655	£6,790	£8,874
<b>Personal items</b>	£122	£271	£1,098	£2,435	£1,464	£3,246
<b>Social activities</b>	£42	£126	£380	£1,138	£506	£1,518
<b>Study costs</b>	£40	£88	£359	£788	£478	£1,051
<b>Other</b>	£23	£48	£208	£432	£277	£576
<b>Total</b>	£1,058	£1,643	£9,525	£14,790	£12,698	£19,721

When planning your finances for any future years of study at Oxford beyond 2019-20, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).
