

Course Information Sheet for entry in 2020-21

DPhil in Molecular Cell Biology in Health and Disease

About the course

You will spend up to four years in one of the department's many research groups, working on a project supervised by the group's principal investigator. During this period you will have the opportunity to take part in the comprehensive training programme organised for graduate students.

After a very short induction period of one or two weeks, during which some basic training is provided, you will start a research project in your supervisor's laboratory.

You will be supervised by a team that includes your main supervisor, a graduate advisor and the Director of Graduate Studies. Your graduate advisor will usually be another experienced principal investigator in the department. Your supervisor may appoint a senior member of the laboratory as your day-to-day supervisor. Most laboratories have weekly meetings where members present and discuss their research results with other members of the laboratory. You will also regularly present your work in progress seminars, which are attended by other research groups working in related areas. Further support is available from your college advisor.

There are a number of key stages in the research programme.

1. Within a month of starting, you will meet with your supervisor and graduate advisor to finalise your project and agree on an initial programme of research.
2. Within the first three months, you will complete an analysis of your training needs with your supervisor.
3. Within the first six months you are expected to complete a literature review on a topic relating to your area of research.
4. After one year you will apply to transfer to DPhil status. To do this you write a report describing your research to date and plans for the future. This will be assessed by two independent experts, who interview you as part of the process.
5. You will apply to confirm your DPhil status by the end of your third year. This involves writing a short progress report and thesis outline and giving a presentation. The application is assessed by two experts.
6. The final stage is submission of your DPhil thesis, which needs to be done within four years.

Whilst working on your research project you will participate in a comprehensive, flexible skills training programme which includes a range of workshops and seminars in transferable skills, generic research skills and specific research techniques. There are also numerous seminars and lectures by local and visiting scientists and you are provided with many opportunities to meet leading scientists.

There are a wide range of events organised for DPhil students. All students participate in an annual graduate students' symposium, which is attended by the entire department. Student contributions are carefully evaluated and prizes are awarded to the best posters or presentations in each year.

Supervision

The allocation of graduate supervision for this course is the responsibility of the Sir William Dunn School of Pathology and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Sir William Dunn School of Pathology.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

Mode of study	Full Time Only
Expected length	3 to 4 years

Costs

Annual fees for entry in 2020-21

Fee status	Annual Course fees
Home/EU (including Islands)	£7,970
Overseas	£26,405

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2020-21 is £508, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2020-21 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£270	£385	£2,430	£3,465	£3,240	£4,620
Accommodation	£630	£760	£5,670	£6,840	£7,560	£9,120
Personal items	£130	£245	£1,170	£2,205	£1,560	£2,940
Social activities	£45	£110	£405	£990	£540	£1,320
Study costs	£40	£95	£360	£855	£480	£1,140
Other	£20	£55	£180	£495	£240	£660
Total	£1,135	£1,650	£10,215	£14,850	£13,620	£19,800

When planning your finances for any future years of study at Oxford beyond 2020-21, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
