

## Course Information Sheet for entry in 2023-24: DPhil in Primary Health Care

### About the course

The Nuffield Department of Primary Care Health Science (NDPCHS) has been one of the world's most important primary care centres for over 20 years, leading world-class research and training to rethink the way healthcare is delivered in general practice and other primary care settings, both across the UK and globally.

Integrating evidence and innovation, the Nuffield Department of Primary Care Health Sciences' main research focus is on the prevention, early diagnosis and management of common illnesses.

The department has methodological strengths in qualitative and applied research; randomised trials; analysis of big data; and evidence synthesis. Much of its research is interdisciplinary and strongly focused on producing benefits for healthcare systems, for the population and for patients.

The department has research groups that are involved in developing and testing complex interventions to prevent non-communicable disease, enhancing self-management of chronic conditions, changing practitioner behaviour and testing interventions for the optimal management of infectious disease.

You can find a list of potential projects on the department's website (see *Further Information and Enquiries*). If you are interested in one of the listed projects please contact the supervisor directly. You are welcome to come up with your own research project. If this is the case, the department's website also provides an overview of the research conducted and the researchers in the department (see *Further Information and Enquiries*). Contact the supervisor(s) that you identify as being most suitable for your proposed project.

Admission to the DPhil is highly competitive. The DPhil programme provides you with a strong training environment and a broad range of research areas and supervisor expertise. Previous research topics (student background in square brackets) include:

- The evaluation and expansion of methodologies relating to the reporting and analyses of intermediate test results: improving the clinical utility of diagnostic research [statistician]
- Targeted prevention and management of cardiovascular risk in low and middle income countries; an implementation intervention for cardiovascular risk scoring in Kenya [nurse/midwife]
- Antibiotic prescribing and resistance in primary care: implications for intervention [GP]
- Optimising the management of hypertension in pharmacies [pharmacist]
- Management of hypertensive disorders of pregnancy in the postpartum period [obstetrician]
- Using conversation analysis to evaluate and design a brief weight loss intervention in primary care [anthropologist]
- Self-management of weight in adults with overweight and obesity: characterising and evaluating cognitive and behavioural strategies [behavioural scientist]
- Weight loss as a predictor of cancer in primary care [GP]
- The optimisation of HbA1c testing in UK primary care [statistician]
- An exploration of the information and decision support needs of people with multiple sclerosis [social scientist]
- Developing and evaluating behavioural interventions to reduce meat consumption [psychologist]
- Supporting successful self-management strategies for people living with chronic pain who have been excluded from pain programmes [physiotherapist]
- Developing and testing an intervention to reduce salt intake [public health].

### Supervision

The allocation of graduate supervision for this course is the responsibility of the Nuffield Department of Primary Care Health Sciences and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Nuffield Department of Primary Care Health Sciences.

You will be appointed at least two Departmental Supervisors with complementary backgrounds and interests, along with a College Advisor. Where appropriate, and relatively rarely, the second supervisor may be appointed from a different department.

Supervision will typically occur monthly for full-time students and two-monthly for part-time ones, along with additional email contact and pastoral support. Most supervisors meet students at least fortnightly in the first few terms, and this may continue throughout the studentship according to the needs of the student and the project.

On entry into the programme, you will receive a full induction and meet individually with the Director of Graduate Studies (DGS) and then twice yearly, as well as on an as-needed basis throughout your programme.

### Assessment

All students will be initially admitted to the status of Probationer Research Student (PRS). Within a maximum of four terms as a full-time PRS student or eight terms as a part-time PRS student, you will be expected to apply for transfer of status from Probationer Research Student to DPhil status.

A successful transfer of status from PRS to DPhil status will require satisfactory progress, submission of a transfer report, and completion of a viva voce assessment. Students who are successful at transfer will also be expected to apply for and gain confirmation of DPhil status to show that your work continues to be on track. This will need to be done within nine terms of admission for full-time students and eighteen terms of admission for part-time students.

Both milestones normally involve an interview with two assessors (other than your supervisor) and therefore provide important experience for the final oral examination.

Full-time students will be expected to submit a substantial, original thesis after three or, at most, four years from the date of admission. If you are studying part-time, you be required to submit your thesis after six or, at most, eight years from the date of admission. To be successfully awarded a DPhil in Primary Health Care you will need to defend your thesis orally (viva voce) in front of two appointed examiners.

### Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. These may include significant changes made necessary by a pandemic (including Covid-19), epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

### Expected length of course

	Full Time	Part Time
Expected length	3-4 years	6-8 years

Information about further funding opportunities for this course can be found on the department's website.

## Costs

### Annual fees for entry in 2023-24

#### Full-time study

Fee status	Annual Course fees
Home	£8,960
Overseas	£29,700

#### Part-time study

Fee status	Annual Course fees
Home	£4,480
Overseas	£14,850

### Information about course fees

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2023-24 is £572, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £600 per term. Please contact your college for more details.

### Additional cost information

#### Full-time study

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

#### Part-time study

Please note that you are required to attend in Oxford for a minimum of 30 days each year, and you may incur additional travel and accommodation expenses for this. Also, depending on your choice of research topic and the research required to complete it, you may incur further additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

If you are studying part-time your living costs may vary depending on your personal circumstances but you must still ensure that you will have sufficient funding to meet these costs for the duration of your course.

The likely living costs for 2023-24 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

### Likely living costs for one month

	Lower range	Upper range
<b>Food</b>	£300	£470
<b>Accommodation</b>	£715	£860
<b>Personal items</b>	£180	£305
<b>Social activities</b>	£40	£90
<b>Study costs</b>	£35	£80
<b>Other</b>	£20	£35
<b>Total</b>	£1,290	£1,840

### Likely living costs for nine months

	Lower range	Upper range
<b>Food</b>	£2,700	£4,230
<b>Accommodation</b>	£6,435	£7,740
<b>Personal items</b>	£1,620	£2,745
<b>Social activities</b>	£360	£810
<b>Study costs</b>	£315	£720
<b>Other</b>	£180	£315
<b>Total</b>	£11,610	£16,560

### Likely living costs for twelve months

	Lower range	Upper range
<b>Food</b>	£3,600	£5,640
<b>Accommodation</b>	£8,580	£10,320
<b>Personal items</b>	£2,160	£3,660
<b>Social activities</b>	£480	£1,080
<b>Study costs</b>	£420	£960
<b>Other</b>	£240	£420
<b>Total</b>	£15,480	£22,080

When planning your finances for any future years of study at Oxford beyond 2023-24, it is suggested that you allow for potential increases in living expenses of 5% or more each year – although this rate may vary significantly depending on how the national economic situation develops.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).

## Document accessibility

If you require an accessible version of the document please contact Graduate Admissions and Recruitment by email ([graduate.admissions@admin.ox.ac.uk](mailto:graduate.admissions@admin.ox.ac.uk)) or via the online form (<http://www.graduate.ox.ac.uk/ask>).
