

Course Information Sheet for entry in 2022-23: DPhil in Translational Health Sciences

About the course

This doctoral degree is in the social science of healthcare innovation and knowledge translation. Building on a relevant masters-level qualification, you will pursue an independent piece of applied research in a health-related field, supervised by an interdisciplinary team.

For the purposes of this programme, the department defines translational health sciences as the study of the human, organisational and societal issues that impact on the adoption, dissemination and mainstreaming of research discoveries and the harnessing of such discoveries to provide effective, efficient and equitable healthcare.

This DPhil, which builds on a linked MSc in Translational Health Sciences, has been developed as a partial response to national and international calls for urgent expansion of postgraduate training in the development, implementation and sustainability of innovations in healthcare. On completion of the DPhil, you will have extended the boundaries of knowledge and undertaken an original empirical study in an aspect of translational health sciences as defined above, and to be ready to embark on independent applied research in this field.

Research topics relevant to this programme may pertain (but need not be restricted) to the following:

- How to influence behaviour eg encourage clinicians to use a new technology in their practice (or indeed how to get them to stop using a technology);
- The extent to which a new drug, medical device or other innovation generates value for different stakeholders;
- The challenges of introducing and sustaining an innovation at an organisational level;
- How policy is made and what prevents it from being 'evidence-based';
- How the regulatory environment can both enable and constrain innovation in healthcare settings;
- How technologies can (and why they do not always) support care practices;
- How patients and citizens might play an active role in research and dissemination;
- How we decide what is right and reasonable in research;
- How industry, academia and government can work together to optimise the acceleration of innovations into practice;
- Implications for global knowledge transfer of international differences in health systems.

It is anticipated that most students on this DPhil will have previously completed the MSc in Translational Health Sciences. Those who apply with a different masters degree will need to complete relevant modules as short courses to address gaps in knowledge or specific research skills. These will be discussed on an individual basis.

As a doctoral student on the DPhil in Translational Health Sciences, you will join other postgraduate research students in a vibrant and varied programme of peer support and extension activities, described in detail under 'resources' below. The department will also encourage and support you to actively build your networks with, and gain experience in, settings outside academia such as healthcare organisations, policymaking, industry and regulation.

The department views the DPhil in Translational Health Sciences both as an extension of the MSc (for students seeking an academic career) and as a means of inspiring the MSc students and adding vibrancy to the MSc course. To that end, you will be encouraged to present your emerging research to MSc students in seminars or guest lectures and offer suitable small-scale projects to MSc students.

The DPhil can be studied on a full-time or part-time basis. The Departmental Postgraduate Handbook provides detailed advice and guidance on starting the DPhil, term dates, working environment, supervisor relationships and troubleshooting, pastoral support and college affiliation.

Supervision

The allocation of graduate supervision for this course is the responsibility of the Nuffield Department of Primary Care Health Sciences and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Nuffield Department of Primary Care Health Sciences.

You will be appointed at least two Departmental Supervisors with complementary backgrounds and interests, along with a College Advisor. Where appropriate, and relatively rarely, the second supervisor may be appointed from a different department.

Supervision will typically occur monthly for full-time students and two-monthly for part-time ones, along with additional email contact and pastoral support. Most supervisors meet students at least fortnightly in the first few terms, and this may continue throughout the studentship according to the needs of the student and the project.

On entry into the programme, you will receive a full induction and meet individually with the Director of Graduate Studies (DGS) and then twice yearly, as well as on an as-needed basis throughout your programme.

Assessment

All students will be initially admitted to the status of Probationer Research Student (PRS). Within a maximum of six terms as a full-time PRS student or twelve terms as a part-time PRS student, you will be expected to apply for transfer of status from Probationer Research Student to DPhil status. This application is normally made by the fourth term for full-time students and by the eighth term for part-time students.

A successful transfer of status from PRS to DPhil status will require submission of a written progress document and defence of that document in an oral presentation to internal examiners. Students who are successful at transfer will also be expected to apply for and gain confirmation of DPhil status to show that your work continues to be on track. This will need to be done within nine terms of admission for full-time students and eighteen terms of admission for part-time students.

Both milestones normally involve an interview with two assessors (other than your supervisors) and therefore provide important experience for the final oral examination.

Full-time students will be expected to submit an original thesis of at least 50,000 words after three or, at most, four years from the date of admission. If you are studying part-time, you will be required to submit your thesis after six or, at most, eight years from the date of admission. To be successfully awarded a DPhil in Translational Health Sciences, you will need to defend your thesis orally (viva voce) in front of two appointed examiners.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. These may include significant changes made necessary by a pandemic (including Covid-19), epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

Expected length of course

	Full Time	Part Time
Expected length	3-4 years	6-8 years

Information about further funding opportunities for this course can be found on the department's website.

Costs

Annual fees for entry in 2022-23

Full-time study

Fee status	Annual Course fees
Home	£8,620
Overseas	£28,560

Further details about fee status eligibility can be found on the fee status webpage (<http://www.graduate.ox.ac.uk/feestatus>).

Part-time study

Fee status	Annual Course fees
Home	£4,310
Overseas	£14,280

Further details about fee status eligibility can be found on the fee status webpage (<http://www.graduate.ox.ac.uk/feestatus>).

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2022-23 is £548, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £600 per term. Please contact your college for more details.

Additional cost information

Full-time study

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Part-time study

Please note that you are required to attend in Oxford for a minimum of 30 days each year, and you may incur additional travel and accommodation expenses for this. Also, depending on your choice of research topic and the research required to complete it, you may incur further additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

If you are studying part-time your living costs may vary depending on your personal circumstances but you must still ensure that you will have sufficient funding to meet these costs for the duration of your course.

The likely living costs for 2022-23 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

Likely living costs

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£290	£410	£2,610	£3,690	£3,480	£4,920
Accommodation	£680	£810	£6,120	£7,290	£8,160	£9,720
Personal items	£135	£260	£1,215	£2,340	£1,620	£3,120
Social activities	£45	£120	£405	£1,080	£540	£1,440
Study costs	£45	£100	£405	£900	£540	£1,200
Other	£20	£55	£180	£495	£240	£660
Total	£1,215	£1,755	£10,935	£15,795	£14,580	£21,060

When planning your finances for any future years of study at Oxford beyond 2022-23, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.

Document accessibility

If you require an accessible version of the document please contact Graduate Admissions and Recruitment by email (graduate.admissions@admin.ox.ac.uk) or via the online form (<http://www.graduate.ox.ac.uk/ask>).
