

## Course Information Sheet for entry in 2021-22: DPhil in Women's and Reproductive Health

### About the course

The DPhil in Women's and Reproductive Health offers a wide range of opportunities to carry out multidisciplinary research on important issues in human reproduction and applied basic science.

Research carried out in the Nuffield Department of Women's & Reproductive Health encompasses a broad range of topics, with groups working on oocytes and sperm, preimplantation genetic diagnosis, genetic studies, molecular and cellular mechanisms underlying normal and aberrant reproductive function, immunology of pregnancy, gynaecological cancer, clinical studies in women's health and pregnancy, and epidemiological and health services research.

As well as carrying out research projects, you will also have the opportunity to attend a variety of skills training sessions and career planning events offered by the Medical Sciences Division.

### Course outline

#### Year one

In the early stages of your DPhil, you will spend the first few months reading scientific literature and planning your first set of experiments. The nature of the work will differ depending upon whether the project involves work in a laboratory or a computer based project. A variety of types of projects are possible, mixing laboratory work with data analysis. Experimental work will be mixed with group discussions with the research team with an opportunity for you to present your results and future plans. Termly reports are submitted by you, your supervisor and the Director of Graduate Studies. You will also have regular interactions with your college tutor. Various training courses are required to be taken in each year of the DPhil and these depend on the nature of the project. Towards the end of your first year, you will be planning your transfer report, which is an important milestone to assess progress and next steps.

#### Year two

A very similar year to year one with ongoing research work and a significant amount of literature reviewing to make sure the project fits in with current knowledge. During this year, many DPhil students start putting down the basis of their thesis introduction. There will be opportunities to attend local conferences and if significant progress has been made, you will submit abstracts, normally in the form of a poster presentation. During year two, you should start putting your research results into a thesis plan.

#### Year three

This is a key year for you where the thesis needs to take shape. You should have a degree of autonomy during the final year, managing your future direction in discussions with your supervisor. Day to day tasks are very similar to year two but you will start putting results in a chapter format. Many students submit or start compiling research papers in year three. Submitting a research abstract to a large international conference should be a target for all DPhil students in year three. By term nine you will undergo a confirmation of status with two internal assessors. This will go over the background to the research, the contents of chapters and the plan for completing the research work and writing the thesis. It is expected that all DPhil students give a WRH departmental seminar in the final year of their DPhil.

### Supervision

The allocation of graduate supervision for this course is the responsibility of the Nuffield Department of Women's & Reproductive Health and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Nuffield Department of Women's & Reproductive Health.

You will be a member of your supervisor's research group in which you will develop your research skills with one to one supervision. Your core supervision team will consist of your principal supervisor, and one or more additional supervisors, which can also include scientists external to Oxford University. You will meet at least every two weeks with your supervisors to plan your research and review your progress. In addition, where needed you will have support from the Director of Graduate Studies and a college advisor.

In the case of students who require specific help to adjust to an academic programme or to a new range of skills, the supervisor will work with them to ensure that they have additional support.

### Assessment

All students will be initially admitted to the status of Probationer Research Student (PRS). Within a maximum of six terms as a PRS student (and normally by the fourth term) you will be expected to apply for transfer of status from Probationer Research Student to DPhil status.

A successful transfer of status from PRS to DPhil status will require the submission of a thesis outline. Students who are successful at transfer will also be expected to apply for and gain confirmation of DPhil status within nine terms of admission, to show that your work continues to be on track.

Both milestones normally involve an interview with two assessors (other than your supervisor) and therefore provide important experience for the final oral examination.

You will be expected to submit an original thesis of a maximum of 50,000 words after three or, at most, four years from the date of admission. To be successfully awarded a DPhil in Women's and Reproductive Health you will need to defend your thesis orally (viva voce) in front of two appointed examiners.

### Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. These may include significant changes made necessary by a pandemic (including Covid-19), epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

### Expected length of course

	Full Time Only
Expected length	3 to 4 years

## Costs

### Annual fees for entry in 2021-22

Fee status	Annual Course fees
Home (UK, Republic of Ireland, Channel Islands & Isle of Man)	£8,290
Overseas (including EU)	£27,460

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2021-22 is £528, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2021-22 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

Likely living costs for 2021-22

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£280	£400	£2,520	£3,600	£3,360	£4,800
<b>Accommodation</b>	£655	£790	£5,895	£7,110	£7,860	£9,480
<b>Personal items</b>	£130	£250	£1,170	£2,250	£1,560	£3,000
<b>Social activities</b>	£45	£115	£405	£1,035	£540	£1,380
<b>Study costs</b>	£45	£100	£405	£900	£540	£1,200
<b>Other</b>	£20	£55	£180	£495	£240	£660
<b>Total</b>	£1,175	£1,710	£10,575	£15,390	£14,100	£20,520

When planning your finances for any future years of study at Oxford beyond 2021-22, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).

## Document accessibility

If you require an accessible version of the document please contact Graduate Admissions and Recruitment by email ([graduate.admissions@admin.ox.ac.uk](mailto:graduate.admissions@admin.ox.ac.uk)) or via the online form (<http://www.graduate.ox.ac.uk/ask>).
