

Course Information Sheet for entry in 2021-22: MSc by Research in Materials

About the course

The Oxford MSc by Research in Materials is a master's level research degree programme, typically of two years duration. Research projects in this leading department are available in most branches of materials science, as well as some aspects of solid state physics and chemistry.

As a student on the Oxford MSc by Research in Materials you will be part of one of the top-ranked materials departments in the world. This vibrant research school consists of around 30 academic staff, 16 Senior Research Fellows, and around 230 research students and 87 postdoctoral researchers. Research students are of many nationalities and come to the department from diverse scientific backgrounds. They are graduates in the traditional subjects of materials science, physics, chemistry and engineering and also mathematics, earth sciences and biology.

The MSc by Research in Materials is normally carried out in two years of full-time study under the supervision of an experienced member of staff.

Only a very small number of places are offered on the MSc by Research in Materials programme each year as the majority of the department's research students are enrolled on the doctoral programme, the DPhil in Materials. The MSc students work, train and study alongside the DPhil students, together forming a cohort of research students in materials.

Details of research degree programmes, including training opportunities (academic courses, research-specific skills and generic transferable career skills) and progression requirements, can be found in the current version of the Materials graduate course handbook, which is available on the department's website.

Research interests of the department extend over most branches of materials science, as well as some aspects of solid state physics and chemistry: they include the study of a wide range of materials of relevance in advanced technological applications, including metals and alloys, composites, semi- and super-conductors, polymers, biomaterials, ceramics and materials for quantum information processing.

Much of the research is carried out in close collaboration with industry. World-leading research takes place on:

- characterisation of materials, where there is emphasis on electron microscopy and related techniques
- processing and manufacturing of materials
- modelling of materials, where there is attention to both structures and processes
- properties of materials
- energy materials, including those for batteries, nuclear fusion and photovoltaics
- quantum information processing, which includes groups working on experimental studies, theory and modelling.

Each of the department's research groups works within one or more of the following broad themes and research projects available to applicants for the MSc by Research in Materials are listed under these themes:

- energy materials
- structural and nuclear materials
- applied superconductivity
- device materials, including semiconductors and NEMS
- polymers and biomaterials
- nanomaterials
- processing and manufacturing, including metals, alloys, ceramics, superconductors and polymers
- characterisation of materials
- computational materials modelling
- quantum information processing (experimental studies, theory, and modelling).

Further information on current research and individual members of staff is available via the Materials Science website.

An overview of the provision for research students in the Department of Materials can be found at the Outline of Provision for Materials Research Students webpage. Also available is Guidance on Supervision Arrangements.

Supervision

The allocation of graduate supervision for this course is the responsibility of the Department of Materials and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Department of Materials.

Assessment

In common with other UK universities the first year is a probationary year, soon after which, subject to satisfactory progress, students normally transfer to full MSc by Research status.

The MSc by Research in Materials is examined at the end of the programme by means of a written thesis and an oral examination.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. These may include significant changes made necessary by a pandemic (including Covid-19), epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

Expected length of course

	Full Time Only
Expected length	2 to 3 years

Costs

Annual fees for entry in 2021-22

Fee status	Annual Course fees
Home (UK, Republic of Ireland, Channel Islands & Isle of Man)	£8,290
Overseas (including EU)	£27,460

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2021-22 is £528, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £400 per term. Please contact your college for more details.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2021-22 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

Likely living costs for 2021-22

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£280	£400	£2,520	£3,600	£3,360	£4,800
Accommodation	£655	£790	£5,895	£7,110	£7,860	£9,480
Personal items	£130	£250	£1,170	£2,250	£1,560	£3,000
Social activities	£45	£115	£405	£1,035	£540	£1,380
Study costs	£45	£100	£405	£900	£540	£1,200
Other	£20	£55	£180	£495	£240	£660
Total	£1,175	£1,710	£10,575	£15,390	£14,100	£20,520

When planning your finances for any future years of study at Oxford beyond 2021-22, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.

Document accessibility

If you require an accessible version of the document please contact Graduate Admissions and Recruitment by email (graduate.admissions@admin.ox.ac.uk) or via the online form (<http://www.graduate.ox.ac.uk/ask>).
