

## Course Information Sheet for entry in 2020-21

### MSc in Evidence-Based Social Intervention and Policy Evaluation

#### About the course

The MSc in Evidence-Based Social Intervention and Policy Evaluation (EBSIPE) emphasises research methods for evaluating interventions and policies, as well as the advanced study of evidence-based practice and policy in relation to, for example, children and families, poverty and inequality, mental health, refugees, drug use, violence and injury prevention, and offending. It aims to develop your critical analysis, problem solving and research skills in the field of evidence-based interventions and policies for social problems, which will allow you to be both a critical consumer of research and to carry out evaluations and other research designs.

The MSc is designed for students with a specific interest in understanding the effectiveness of policies, such as regulations concerning alcohol and drug abuse or gun control, public health or poverty policies, and social interventions, such as cash transfers, parenting education, or violence prevention programs. It prepares students for a career in, for example, development, public policy, or policy and programme evaluation. Applicants with a professional background, such as those in evaluation, public health or policy consulting, will enhance their research skills and develop a major piece of research in a world-class environment.

The MSc has five major components:

- core course on evaluation methods
- pathway course, either Social Intervention or Policy Evaluation
- specialist option, eg Children and families, Social policies and health inequalities, or Community-level programmes and policies
- research methods training (Quantitative and qualitative methods, R-programming, Systematic reviews)
- MSc thesis.

Assessment will be based on your MSc thesis, the methods workbook and two three-hour written examination papers.

#### Core course in evaluation methods

This course, taken over two terms, trains students to critically consume and produce evaluation research for policies and social interventions, focusing on multiple methods, including randomised controlled trials and quasi-randomised methods, qualitative evaluation and systematic review methods. The course has a strong focus on 'open science' and research transparency.

#### Pathway course

You will select one of two available pathways, to be taken over two terms:

- Social Intervention, covering evidence-based methods to evaluate social interventions, theories underlying interventions, ethical issues, and applying research in practice and policy, including the challenges of implementing programmes in the real world; or
- Policy Evaluation, introducing you to social policy analysis, policy formation, and the relationship between evidence and policy, and to different research methods for evaluating policies, eg quasi- experimental designs, natural experiments

You may be able to change your choice of pathway in the first week of the programme.

#### Specialist options

You will take a one-term specialist courses from a list of options which may include Children and Families, Social Policies and Health Inequalities, Community-level programmes and policies.

MSc students may attend advanced methods classes, such as Intermediate Statistics, in their second year.

#### Research methods training

Students following the social intervention or policy evaluation pathway take a core evaluation methods course. In addition, all students in the MSc EBSIPE take the following methods courses:

- systematic reviews, quantitative, qualitative and mixed methods, ie to learn to synthesise the best available evidence (2 terms)
- quantitative methods, ie key statistical concepts and application in the leading software, R (1 term)
- qualitative research methods, ie design, data collection, analysis and qualitative meta-synthesis (1 term)
- field methods, ie managing, costing and running real-world evaluations.

Specialist interdisciplinary training in systematic reviews has led to published Masters' theses, for example:

- van Urk (2014)
- Grant (2013)
- Knerr (2013)
- Vlahovicova (2017)

Whichever pathway you take, you will write a 10,000-word thesis on a topic agreed with your supervisor. The thesis is undertaken throughout the duration of the course.

### Supervision

The allocation of graduate supervision for this course is the responsibility of the Department of Social Policy and Intervention and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Students are able to meet their potential supervisor in the first week of term. Under exceptional circumstances a supervisor may be found outside the Department of Social Policy and Intervention.

In the case of students who require specific help to adjust to an academic programme or to a new range of skills, the supervisor will work with them to ensure that they have additional support.

### Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

### Expected length of course

<b>Mode of study</b>	Full Time Only
<b>Expected length</b>	12 months

## Costs

### Annual fees for entry in 2020-21

Fee status	Annual Course fees
Home/EU (including Islands)	£17,070
Overseas	£26,405

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees and living costs. However, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Please note that, depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2020-21 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£270	£385	£2,430	£3,465	£3,240	£4,620
<b>Accommodation</b>	£630	£760	£5,670	£6,840	£7,560	£9,120
<b>Personal items</b>	£130	£245	£1,170	£2,205	£1,560	£2,940
<b>Social activities</b>	£45	£110	£405	£990	£540	£1,320
<b>Study costs</b>	£40	£95	£360	£855	£480	£1,140
<b>Other</b>	£20	£55	£180	£495	£240	£660
<b>Total</b>	£1,135	£1,650	£10,215	£14,850	£13,620	£19,800

When planning your finances for any future years of study at Oxford beyond 2020-21, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).
