

## Course Information Sheet for entry in 2020-21

### MSc in Translational Health Sciences

#### About the course

This new course takes an interdisciplinary and applied approach to the challenges of implementing innovations and research discoveries in a health care setting.

Utilising innovations to meet healthcare needs is a global imperative – and one that can only become more urgent as demands on our health care systems increase. This applied MSc course brings robust, interdisciplinary and practice-based approaches to addressing the challenges of research translation.

Our key focus will be theory and method in the ‘downstream’ phases of translational health sciences – that is, the human, organisational and societal issues that influence the adoption, dissemination and mainstreaming of research discoveries. You can expect to gain a coherent overview of how different academic disciplines can inform problem-solving and guide action in translational health sciences, along with a rigorous interdisciplinary training to further develop your intellectual and research skills.

The course is ideal for researchers who want to study scientific and technological innovation in a healthcare setting and research managers looking to run clinical trials or promote the uptake of research findings. It will also assist entrepreneurs (from industry or the public sector) who seek to improve patient care through innovation and policymakers (local and national) wishing to support research and its translation to improve services. For students interested in undertaking doctoral research, the MSc will prepare them to apply for a DPhil in translational health sciences. We expect all students to have some relevant past experience in a work environment.

To complete the MSc, you must take one compulsory module, five modules from a list of options, and complete a dissertation of up to 15,000 words. Modules typically involve:

- preparatory reading
- structured individual and group activities (delivered online)
- a one-week intensive residential course with lectures, small-group activities and assessed group presentations
- an online follow-up to support you in writing your module assignment (a 4,000-word essay).

Throughout the course you will have a personal supervisor from within the MSc teaching team.

Our teaching model aims to make full use of our students’ real-world experience and diversity. Once you have covered key principles and topics, you will be encouraged to immerse yourself in case studies (some of which can be from your own experience) and to contribute actively and critically to group discussions. Your learning will be further enriched with input from visiting lectures, experts-in-residence and organisations outside academia (potential examples would include biotech and software companies, policy bodies such as NICE and patient charities).

#### Supervision

The allocation of graduate supervision for this course is the responsibility of the Nuffield Department of Primary Care Health Sciences and/or the Department for Continuing Education and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Nuffield Department of Primary Care Health Sciences and/or the Department for Continuing Education.

#### Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University’s Terms and Conditions.

**Expected length of course**

<b>Mode of study</b>	Part Time Only
<b>Expected length</b>	2 to 4 years

## Costs

### Modular course fees

The fees for this course are charged on a modular basis. You will pay an annual course fee and an additional fee for each module studied. A minimum of two annual course fees are payable for this course. If this course includes a dissertation, three module fees will be charged for the dissertation.

#### Fees for the 2020-21 academic year

Fee status	Annual Course Fee	Fee per module	Total estimated fees
Home/EU (including Islands)	£6,585	£2,000	Please see the department's website for further details
Overseas	£6,585	£2,000	

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

### Additional cost information

This course has residential sessions in Oxford. You will need to meet your travel and accommodation costs in attending these sessions. Further, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

If you are studying part-time your living costs may vary depending on your personal circumstances but you must still ensure that you will have sufficient funding to meet these costs for the duration of your course.

The likely living costs for 2020-21 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£270	£385	£2,430	£3,465	£3,240	£4,620
<b>Accommodation</b>	£630	£760	£5,670	£6,840	£7,560	£9,120
<b>Personal items</b>	£130	£245	£1,170	£2,205	£1,560	£2,940
<b>Social activities</b>	£45	£110	£405	£990	£540	£1,320
<b>Study costs</b>	£40	£95	£360	£855	£480	£1,140
<b>Other</b>	£20	£55	£180	£495	£240	£660
<b>Total</b>	£1,135	£1,650	£10,215	£14,850	£13,620	£19,800

When planning your finances for any future years of study at Oxford beyond 2020-21, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).
