

Course Information Sheet for entry in 2023-24: PGDip in Health Research

About the course

The Postgraduate Diploma (PGDip) in Health Research is designed for medical and dental trainees with the potential to become independent researchers, and to be taken part-time alongside work commitments, normally over one to three years.

The Postgraduate Diploma (PGDip) in Health Research will help you to:

- develop skills of research, design and data analysis in both qualitative and quantitative research;
- critically evaluate health research;
- identify, critically appraise and incorporate the results of medical and social science research into the day-to-day decision making of clinical, scientific and administrative practice;
- apply the principles of evidence-based practice in health care settings;
- plan how to implement the findings of research to improve health care; and
- use theories and principles underpinning clinical research to inform their own research practice.

The programme is delivered through the Department for Continuing Education, with the expertise in curriculum design and teaching drawn from the Nuffield Department of Primary Care Health Sciences, the Centre for Evidence-Based Medicine and the Clinical Academic Graduate School.

You will take two compulsory modules and four option modules from those currently available; further information on all course modules is available via the course page on the Department for Continuing Education website (see *Further Information and Enquiries*).

The two compulsory modules are:

- The Practice of Evidence-Based Health Care
- Introduction to Study Design and Research Methods.

Three further modules may be chosen from List B; one further module may be chosen either from List B or List C.

List B:

- Clinical Trial Management
- Mixed Methods in Health Research
- Knowledge into Action
- Evidence-based Diagnosis and Screening
- Introduction to Statistics for Health Care Research
- Systematic Reviews
- Randomized Controlled Trials
- Qualitative Research Methods
- Essential Medical Statistics
- The Structure of Clinical Trials and Experimental Therapeutics
- How to do Research on Therapeutic Interventions: Protocol preparation
- Biological Therapeutics
- Pharmacodynamics, Biomarkers and Personalised Therapy
- Adverse drug reactions, drug interactions and Pharmacovigilance
- Drug development, Pharmacokinetics and Imaging

List C:

- Quality Improvement Science and Systems Analysis
- Human Factors, Teamwork and Communication
- Becoming a Clinical Educator
- Teaching Evidence-Based Practice

The majority of modules are run over either an eight, or fifteen week learning cycle. Most modules are either delivered fully online or in a blended format, however, some modules are only delivered with a blended format that includes a 5 day attendance in Oxford, and some are only run entirely online. In any given year, not all delivery formats for a module may be available.

Blended format: an initial period of self-directed study is spent on introductory activities using a Virtual Learning Environment (VLE). This is followed by a week spent in Oxford for supported face-to-face teaching, and then a further period of Post-Oxford activities (a mixture of self-directed and supported distance learning also delivered through the VLE). The final week of each module is for self-directed personal study, shortly followed by the assignment submission.

Fully online format: These are delivered through the VLE with the first week allocated to self-directed introductory activities. There is then either:

- a number of units to work through which are released week by week. Each unit includes a mixture of supported and self-directed learning with discussion forums, tasks and activities. Students then have five weeks of self-directed personal study with use of a revision forum and the requirement to submit an assignment electronically the following week. Courses usually run over a 15 week period.

Or

- an intensive week of 5 consecutive days of synchronous and asynchronous teaching sessions, and then a further period of activities (A mixture of self-directed and supported distance learning also delivered through the VLE). The final week of each module is for self-directed personal study, shortly followed by the assignment submission. Courses usually run over an 8 week period.

Modules are spaced out throughout the academic year, allowing a choice of options to be taken over the one to three years students attend the course. Not all modules are guaranteed to run every year.

In addition to the skills acquired during the PGCert in Health Research, graduates of the PGDip will be able to demonstrate an ability to apply health research techniques appropriately to research questions, and apply health research solutions appropriately when analysing health research problems.

Part-time attendance details

As a part-time student, you will be required to attend a minimum of two modules (one of which must be a compulsory module) 'in person' in Oxford. Each 'in person' module requires you to attend a week (5 days) in Oxford for supported face to face teaching. Your other 4 modules can be made up of a mix of 'in person', or fully online modules. For additional note: All students are required to attend a minimum of one module in each academic year on course. This can either be 'in person' or fully online.

Supervision

The provision of supervision, where required, is subject to the following points:

- The allocation of graduate supervision for this course is the responsibility of the Department for Continuing Education and this role will usually be performed by the Course Director.
- Under exceptional circumstances a supervisor may be found outside the Department for Continuing Education and/or the Nuffield Department of Primary Health Care Sciences.

Assessment

Assessment for each module will be based on a written assignment.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. These may include significant changes made necessary by a pandemic (including Covid-19), epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

Expected length of course

	Part Time Only
Expected length	1 to 3 years

Costs

Modular course fees

The fees for this course are charged on a modular basis. You will pay an annual course fee and an additional fee for each module studied. A minimum of two annual course fees are payable for this course. If this course includes a dissertation, three module fees will be charged for the dissertation.

Fees for the 2023-24 academic year

Fee status	Annual Course Fee	Fee per module	Total estimated fees
Home	£7,695	£2,340	Please see the department's website for further details
Overseas	£7,695	£2,340	

Information about course fees

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Additional cost information

This course has residential sessions in Oxford so you will need to meet any travel and accommodation costs you may incur in attending these sessions.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

If you are studying part-time your living costs may vary depending on your personal circumstances but you must still ensure that you will have sufficient funding to meet these costs for the duration of your course.

The likely living costs for 2023-24 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

Likely living costs for one month

	Lower range	Upper range
Food	£300	£470
Accommodation	£715	£860
Personal items	£180	£305
Social activities	£40	£90
Study costs	£35	£80
Other	£20	£35
Total	£1,290	£1,840

Likely living costs for nine months

	Lower range	Upper range
Food	£2,700	£4,230
Accommodation	£6,435	£7,740
Personal items	£1,620	£2,745
Social activities	£360	£810
Study costs	£315	£720
Other	£180	£315
Total	£11,610	£16,560

Likely living costs for twelve months

	Lower range	Upper range
Food	£3,600	£5,640
Accommodation	£8,580	£10,320
Personal items	£2,160	£3,660
Social activities	£480	£1,080
Study costs	£420	£960
Other	£240	£420
Total	£15,480	£22,080

When planning your finances for any future years of study at Oxford beyond 2023-24, it is suggested that you allow for potential increases in living expenses of 5% or more each year – although this rate may vary significantly depending on how the national economic situation develops.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.

Document accessibility

If you require an accessible version of the document please contact Graduate Admissions and Recruitment by email (graduate.admissions@admin.ox.ac.uk) or via the online form (<http://www.graduate.ox.ac.uk/ask>).
