

Course Information Sheet for entry in 2020-21

PGDip in International Wildlife Conservation Practice

About the course

The Recanati-Kaplan Centre Postgraduate Diploma in International Wildlife Conservation Practice is an eight-month, full-time course for early-career wildlife researchers.

The course is designed to enhance the skills of conservation science practitioners by teaching field survey techniques, data analysis methods, and reporting techniques commonly used in the study of terrestrial mammals. The course aims to help ecologists and field biologists in the developing world to implement effective conservation research and action.

The course is delivered by the Department of Zoology's Wildlife Conservation Research Unit (WildCRU), which has been active in conservation research and practice for more than three decades. The course is made possible by a donation from the Recanati-Kaplan Foundation, and is jointly managed with the Department for Continuing Education.

The focus of the course is on methods commonly used in the study of large mammals, and especially carnivores, in the developing world. The curriculum consists of modules on wildlife ecology, monitoring and survey techniques, GIS and habitat assessment, population management and statistics, as well as two reports which together complete an independent research project. The mode of teaching involves lectures, group discussions, technical practicals on the use of computer software, field sessions and tutorials.

The independent research project concentrates on the organisation, analysis and reporting of previously collected data that you bring with you or is provided by WildCRU researchers. There is no time to undertake primary data collection in country or abroad during the course duration. The project is divided into two phases: Phase One consists of a literature and methods review and a section containing data exploration; Phase Two builds upon this but also includes the full data analysis and discussion of results. Unifying threads running through the course are the global and human dimensions of biodiversity conservation. You will learn both the theory and practical aspects of field techniques, so that you can confidently adopt them in the future, as well as critically evaluate other projects.

Assessment is through the two reports of the independent research project and four assignments. The project reports will be a maximum of 7,000 words, and each worth 30% of your final mark. The assignments will be up to 2,000 words, and each worth 10% of your final mark. Most module assignments will be short-answer questions, presenting data to be analysed, scientific research to critique, a problem for which you will design solutions, or information to be synthesised into a brief report/recommendation.

Up to eight students are accepted each year and applications are particularly welcomed from conservationists working in economically less-developed parts of the world, for whom need-based scholarships are available. Suitable candidates are early-career field conservationists, working with government agencies or NGOs, who will implement and disseminate their skills to their home countries.

Please note that the course is not suitable for individuals who are not currently working in an ecology or conservation research role. For entry-level ecology and wildlife conservation courses, please see the Short and Online Courses in the natural sciences run by the Department of Continuing Education.

Supervision

The allocation of graduate supervision for this course is the responsibility of WildCRU and the Department of Zoology, in conjunction with the Department for Continuing Education, and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the WildCRU, the Department of Zoology and the Department for Continuing Education.

Changes to courses

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

Mode of study	Full Time Only
Expected length	8 months

Costs

Annual fees for entry in 2020-21

Fee status	Total Course fees
Home/EU (including Islands)	£12,335
Overseas	£12,335

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Additional cost information

This course is residential near Oxford, so you will need to meet your travel and accommodation costs; however, grants are available covering fees, accommodation and travel. Please see the course page on the department's website for further details. Further, as part of your course requirements, you may need to choose a dissertation, a project or a thesis topic. Depending on your choice of topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2020-21 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£270	£385	£2,430	£3,465	£3,240	£4,620
Accommodation	£630	£760	£5,670	£6,840	£7,560	£9,120
Personal items	£130	£245	£1,170	£2,205	£1,560	£2,940
Social activities	£45	£110	£405	£990	£540	£1,320
Study costs	£40	£95	£360	£855	£480	£1,140
Other	£20	£55	£180	£495	£240	£660
Total	£1,135	£1,650	£10,215	£14,850	£13,620	£19,800

When planning your finances for any future years of study at Oxford beyond 2020-21, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.
