

## Course Information Sheet for entry in 2022-23: Synthesis for Biology and Medicine (Centre for Doctoral Training)

### About the course

The SBM CDT programme offers joint academic-industrial training in all aspects of chemical synthesis coupled with an in-depth appreciation of its application to biology and medicine.

The programme aims to train next-generation doctoral scientists capable of addressing major challenges across the entire remit of organic chemistry, with a focus on skills relevant to the pharmaceutical and agrochemical industries.

Designed in collaboration with international pharmaceutical and agrochemical companies who have offered specific expertise to enhance the CDT's training and research, the CDT has adopted an open-access model to ensure free exchange of information, knowledge and expertise between all students, academics and industrial partners.

Students are admitted to the programme without being assigned to a specific research group and are trained initially through a series of taught courses in a single cohort in all aspects of organic synthesis. Details on the modules are provided on the course's website. Students subsequently undertake two 16-week research rotations in laboratories of their choosing before joining a specific group for a substantive three-year DPhil research project. To enable significant and long term research goals to be tackled, research projects are clustered into four broad areas ('project fields'):

- new reaction discovery
- exploring new molecular space
- natural product chemistry
- tools for chemical biology.

During all four years of the programme, students also receive a tailored programme designed to broaden their research and professional skills.

### Supervision

The allocation of graduate supervision for this course is the responsibility of the Department of Chemistry and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. A supervisor may also be found outside the Department of Chemistry.

In the case of students who require specific help to adjust to an academic programme or to a new range of skills, the supervisor will work with them to ensure that they have additional support.

You can typically expect to meet with your supervisor or a senior member of the research team on a weekly basis.

### Assessment

All modules during the taught course involve some aspect of formal assessment, including written reports, problem solving, and group and individual presentations. Similarly, each project rotation will be assessed based on a short report submitted thereafter.

A termly report on the student's progress is submitted by their supervisor throughout the course.

All students will be initially admitted to the status of Probationer Research Student (PRS). Within a maximum of six terms as a PRS student (and normally by the end of the fifth term for CDT students) you will be expected to apply for transfer of status from Probationer Research Student to DPhil status.

A successful transfer of status from PRS to DPhil status will require the submission of a report and oral examination. Students who are successful at transfer will also be expected to apply for and gain confirmation of DPhil status within nine terms of admission, to show that your work continues to be on track.

Both milestones normally involve an interview with two assessors (other than your supervisor) and therefore provide important experience for the final oral examination.

You will be expected to submit a thesis after four years from the date of admission. To be successfully awarded a DPhil in Synthesis for Biology and Medicine you will need to defend your thesis orally (viva voce) in front of two appointed examiners, one of whom is normally from Oxford and one from elsewhere.

**Changes to courses**

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. These may include significant changes made necessary by a pandemic (including Covid-19), epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

**Expected length of course**

	<b>Full Time Only</b>
<b>Expected length</b>	4 years

## Costs

### Annual fees for entry in 2022-23

Fee status	Annual Course fees
Home	£8,620
Overseas	£28,560

Further details about fee status eligibility can be found on the fee status webpage (<http://www.graduate.ox.ac.uk/feestatus>).

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2022-23 is £548, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £600 per term. Please contact your college for more details.

### Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

## Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2022-23 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

Likely living costs

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
<b>Food</b>	£290	£410	£2,610	£3,690	£3,480	£4,920
<b>Accommodation</b>	£680	£810	£6,120	£7,290	£8,160	£9,720
<b>Personal items</b>	£135	£260	£1,215	£2,340	£1,620	£3,120
<b>Social activities</b>	£45	£120	£405	£1,080	£540	£1,440
<b>Study costs</b>	£45	£100	£405	£900	£540	£1,200
<b>Other</b>	£20	£55	£180	£495	£240	£660
<b>Total</b>	£1,215	£1,755	£10,935	£15,795	£14,580	£21,060

When planning your finances for any future years of study at Oxford beyond 2022-23, you should allow for an estimated increase in living expenses of 3% each year.

More information about how these figures have been calculated is available at [www.graduate.ox.ac.uk/livingcosts](http://www.graduate.ox.ac.uk/livingcosts).

## Document accessibility

If you require an accessible version of the document please contact Graduate Admissions and Recruitment by email ([graduate.admissions@admin.ox.ac.uk](mailto:graduate.admissions@admin.ox.ac.uk)) or via the online form (<http://www.graduate.ox.ac.uk/ask>).
