

Dear Test Centres/ Exam Officers,

We delivered admission tests for 8 subjects, across 2200+ schools in 107 countries between 19th and 20th October 2023. While the tests were successfully administered in other countries, there were technical difficulties faced by the students taking some of the tests in the UK. It is upsetting for all, that this disruption has been caused to these students and test centres. We are sorry that the experience did not meet your expectations.

As you are aware, Oxford's [special consideration form](#) is available for anyone who feels that a student's performance was impacted by their experience on the test day. -Please note that the deadline for submission of this form has been extended to the 1st November.

Regards,

TCS Project Team
